### Description

The Si595 VCXO utilizes Skyworks Solutions' advanced DSPLL® circuitry to provide a low-jitter clock at high frequencies. The Si595 is available with any-rate output frequency from 10 to 810 MHz. Unlike traditional VCXOs, where a different crystal is required for each output frequency, the Si595 uses one fixed crystal to provide a wide range of output frequencies. This IC-based approach allows the crystal resonator to provide exceptional frequency stability and reliability. In addition, DSPLL clock synthesis provides supply noise rejection, simplifying the task of generating low-jitter clocks in noisy environments. The Si595 IC-based VCXO is factory-configurable for a wide variety of user specifications including frequency, supply voltage, output format, tuning slope, and absolute pull range (APR). Specific configurations are factory programmed at time of shipment, thereby eliminating the long lead times associated with custom oscillators.

## 3. Ordering Information

The Si595 supports a variety of options including frequency, temperature stability, tuning slope, output format, and  $V_{DD}$ . Specific device configurations are programmed into the Si595 at time of shipment. Configurations are specified using the Part Number Configuration chart shown below. Skyworks Solutions provides a web browser-based part number configuration utility to simplify this process. To access this tool refer to <https://www.skyworksinc.com/en/Application-Pages/Timing-Lookup-Customize>. The Si595 VCXO series is supplied in industry-standard, RoHS compliant, lead-free, 6-pad, 5 x 7 mm and 3.2 x 5 mm package. Tape and reel packaging is an ordering option.

Example Part Number. 595AE148M500DGR is a 5 x 7 mm VCXO in a 6 pad package. The nominal frequency is 148.5 MHz, with a 3.3 V supply, LVPECL output, and Output Enable active high polarity. Temperature stability is specified as  $\pm 20$  ppm and the tuning slope is 95 ppm/V. The part is specified for a -40 to +85 °C ambient temperature range operation and is shipped in tape and reel format.
