SPnT Coaxial Subminiature Switches DC to 6 GHz, DC to 26.5 GHz, DC to 40 GHz

R591 RADIALL coaxial subminiature switches have a typical operating life exceeding 25 million cycles. Excellent RF & repeatability characteristics along with a guaranteed life of 10 million cycles make these switches ideal for Automated Test Equipment (ATE) and other measurement applications. These miniature switches are also an excellent choice for Mil/Aero applications due to their small size, light weight, as well as outstanding shock and vibration handling capabilities.

PART NUMBER SELECTION

(1) The "QLF" tradermark (quick lock formula®) standard applies to QMA and QN series and guarantees the full intermateability between suppliers using this tradermark. Using QLF certified connectors also guarantees the specified level of RF performances.

- (2) Connector SMA2.9 is equivalent to "K Connector®", registered trademark of Anritsu
- (3) Available with "solder pins " models only
- (4) Polarity is not relevant to application for switches with TTL driver
- (5) Suppression diodes are already included with TTL option
