Power over Ethernet (PoE) Solutions

## EXPOSED POWER OVER ETHERNET (PoE) Circuit Conditioning

*\*The Bourns® model SM51625EL transformer is built to meet IEEE 802.3 specification, by fitting in the specified limits defined in the Clause 40.8.3 for Medium Dependent Interface (MDI) of the IEEE 802.3-2012, thus helps ensure an application's compliance to IEEE 802.3-2012.*

*The schematic shown here illustrates the conditioning of the application and does not constitute the complete circuit design. Customers should verify actual device performance in their specific applications.*

### Product

SM51625EL

### Design Kit

TEL-NOTEKIT-2

### Objective

Introduction of a high current PoE transformer, enabling higher power applications for outdoor PoE applications

### Solution

High current transformer:

- SM51625EL

### Compliance\*

IEEE802.3

### Features & Benefits

This solution enables high power delivery over Ethernet cables without impacting signal integrity
