

# RSF Connector

## Connectors for Tabs

### Features

#### •Secure locking, easy insertion

The combination of terminal and housing allows easy mating to a male tab. Unmating is equally easy. Simply hold the housing and pull. The contact locking spring is depressed by the taper inside the housing. The locking mechanism prevents accidental disengagement of the contact from the mating tab.

#### •Stable contact performance

The contact is designed as a low insertion force with a large contact area to give stable performance, even when high current is applied.

#### •Lanceless contacts help prevent back out

Removal of the locking lance from the contact and putting it in the housing eliminates a major cause of contact backout due to damaged locking lances during termination and harness assembly.

#### •Housing options

Selective removal of the built-in keys, allows for an infinite number of keying possibilities. In addition, contact cavities can be blocked using the cavity blocking plug or molded into the housing when volume requirements dictate. The housings can be molded in various colors.

### Specifications

- Current rating: 20A AC, DC max.(#250 tab + AWG#12)
- Voltage rating: 250 AC, DC max.
- Temperature range: -40°C to +105°C  
(including temperature rise in applying electrical current)
- Contact resistance: Initial value/3m  $\Omega$  max.  
After environmental testing/ 6m  $\Omega$  max.
- Insulation resistance: 1,000M  $\Omega$  min.
- Withstanding voltage: 2,000V AC/minute
- Applicable wire: #250...AWG #22 to #12
- Applicable tab: #250 Tab 0.8mm thick
- Contact JST if Lead-Free product is required.
- Refer to "General Instruction and Notice when using Terminals and Connectors at the end of the catalogue.
- Contact JST for details
