ITT

We Connect

When it matters most

For more than a century, ITT Cannon has developed innovative interconnect solutions for the world's harshest environments. With facilities in the United States, Germany, Italy, Mexico, China and Japan, each with its unique strengths, we offer our customers interconnect solutions that are truly Engineered for Life.

In addition to this truly global footprint, we offer highly specialized, segmented industry expertise. We have a proven track record as an industry leader in harsh-environment applications. This has equipped us with the knowledge needed to continue to produce the most resilient, reliable connectors for our customers' most challenging conditions.

Interconnect solutions for the harshest environments.

The ITT Cannon difference

- Global capabilities & local support
- Proven application expertise
- A century of interconnect leadership
- A committed innovator & business partner

cannon

About ITT

ITT is a diversified leading manufacturer of highly engineered critical components and customized technology solutions for the energy, transportation and industrial markets. Building on its heritage of innovation, ITT partners with its customers to deliver enduring solutions to the key industries that underpin our modern way of life. Founded in 1920, ITT is headquartered in Stamford, Connecticut, with employees in more than 35 countries and sales in a total of approximately 125 countries. For more information, visit itt.com.

Our connector portfolio remains the most extensive in the industry.

Offering a reliable and cost effective range of interconnect solutions.

Introduction to D-Sub Accessories

Originally designed & patented by Cannon engineers for use on commercial & military aviation systems, D-Sub Connectors were manufactured as a smaller, lightweight alternative to many of the large, heavier circular electronic plugs of the time. This small but robust rectangular interconnect solution was quickly adopted across a number of applications and industries, and the Cannon D-Sub soon became the first multi-purpose connector of its kind.

Today, Cannon offers an array of commercial or military grade D-Sub styles, sizes, configurations and accessories.

- EMI Shielded, Metal or Plastic Backshells
- Straight or Angled Exit
- One –Piece Snap Together or Locking Backshells
- Locking Hardware
- Guide Pin Plates
- Interfacial Seals
- Dust Cams

Aluminum Metal Backshell

Lightweight, High-Performance Straight, 90°, and 45° Aluminum Backshells with EMI Shielding

ITT Cannon's new aluminum backshell technology meets all harsh-environment performance requirements while providing over 50% weight reduction compared to traditional D-Sub backshells without compromising on Electromagnetic Interference (EMI) Shielding and maximum wire termination space and protection.

Specifications	
Temperature Range	-60 deg. C to 200 deg. C
Material & Finish	
Backshell Material:	A380 die cast Aluminum
Backshell Finish:	Electroless Nickel
Hardware Material	Stainless Steel
Hardware Finish	Passivate

Product Features

- Straight, 45°, and 90° cable exit
- Optimal EMI shielding performance with minimal air gaps
- Innovative, lightweight A380 aluminum construction
- Electroless Nickel Plating
- 360° compression shielding
- Front mounting with #4-40 fillister head screws
- Side mount slots accommodating ty-wrap or #4-40 fillister head screws
- RoHS and REACH Compliance (EMI) Shielding and maximum wire termination space and protection

Zinc Metal Backshell

Die Cast Zinc Backshell, Straight Exit, EMI Shielded

Die cast metal backshells reduce EMI/RFI emissions. Die cast metal backshells offer improved shielding in a rugged package.

Product Features

- Improves conformance to FCC DOC #20780 shielding requirements
- No crimp ferrule tooling needed
- Kit consists of 1 front shell, 1 rear shell, 2 screws, 2 hex nuts, 2 mounting screws, 2 end brackets, 1 set of compression inserts

Zinc Metal Backshell Straight Exit - D*FM

D*FM metal Backshells for D-Subminiature Connectors offers protection from magnetic and radio interferences to cable assemblies.

Product Features

- No crimp ferrule tooling needed
- Material: Zinc, blue chromated
- Unique metal filled plastic cable strain relief guarantees 360° shielding
- RoHS compliant
- -40 - +120°C temperature range
- Corrosion resistant

Size 15

Part Description With #4-40 UNC Jackscrew	Part Description With M3 Jackscrew	Shell Size	A	B	C	D	Cable Diameter
DEFME-101	DEFMX-101	Size 9	39,55mm [1.555inch]	31,3mm [1.232inch]	14,6mm [0.575inch]	25,0mm [0.984inch]	4 - 9mm

Kit consists of 1 front shell, 1 rear shell, 4 strain reliefs, 2 mounting crosshead screws, and 2 jack screws.

Assembly instructions Size 9, 15, 25, 37

Attenuation

Use two halves of strain relief (different sizes can be mixed)

Strip cable 18mm and shape cable to two pigtails

Attach the strain relief around the cable

Bend cable shielding back on outside of strain relief

Mount connector and cable into the backshell

Assemble the other half (screwing force: 100-120 Ncm)

Dimensions shown in mm
Specifications and dimensions subject to change

Plastic Backshell

Snap-Together Metalized Plastic

Metalized plastic backshells reduce EMI/RFI emissions. Metalized plastic provides a lightweight solution. Includes integral strain relieving cable clamp.

Product Features

- Improves conformance to FCC DOC #20780 shielding requirements
- No crimp ferrule tooling needed
- Quick and simple assembly using snap-together design feature
- Non-metalized, non-shielded versions available

Attenuation

Note: Cable grounding tang not available on DE size backshell.

Specifications	
Attenuation:	-49 dB @ 100MHz
Temperature Range:	-20° C to 80° C

Materials and Finishes	
Material:	Thermoplastic, UL 94V-0 rated
Finish:	Nickel over Copper

Straight Exit

- Kit consists of 1 front shell, 1 rear shell, 1 cable clamp, 2 screws
- Optional locking hardware sold separately, see page 15

Locking Hardware

Screw Lock Assemblies

Refer to the accessories selection guide on page 6 for use with Cannon backshells. Male or Female RoHS compliant stainless steel and brass versions are available. Please contact factory for more information.

Product Features

- Ensures positive mating
- Provides locking and latching for high vibration applications

Male Screw Lock

- Kit consists of 1 screw and 1 clip
- Order 2 per connector
- Similar to M24308/25

Loose Spacer

Part Number: 253-0343-000 (D*M Style)
 Part Number: 253-0343-011 (D*MA Style)
 Part Number: 253-0343-016 (D*MA Style) St. Stl.

Dim A
 5.84 ± .08 (.230 ± .003)
 9.40 ± .13 (.370 ± .005)
 9,40 +/- 0,13 (.370 +/- .005)

Materials and Finishes	
Material:	Aluminum
Finish:	Chromate over Cadmium

RoHS compliant stainless steel and brass versions are available, please contact factory for more information.

Slide Lock Assemblies

ITT offers the largest variety of locking and latching hardware. Refer to the accessories selection guide on page 6 for use with Cannon backshells.

Product Features

- Ensures positive mating
- Provides locking and latching for high vibration applications

Sliding Lock Retainer Assembly

- Kit consists of 1 sliding lock plate, 2 mounting screws, 2 lock washer, 2 hex nuts
- Order 1 kit per connector

Descriptions	Material	Finish/Treatment
Sliding Lock Plate	Stainless Steel	Passivated
Screw, Mounting	Steel	Trivalent Chromate over Zinc
Washer Lock	Steel	
Nut, Hex	Steel	

Shell Size	Layout	Part Number	A ± 0,38 (.015)	B ± 0,38 (.015)	C ± 0,13 (.005)

Spring Latch Assemblies

Refer to the accessories selection guide on page 6 for use with Cannon backshells.

Product Features

- Low Cost
- Minimizes field connection time
- Positive lock between connectors
- Packaged 2 kits per bag

Unlocked

Locked

Materials and Finishes

Material:	Stainless Steel
Finish:	Passivated

Spring Latch Plate Assembly

- Kit consists of 1 plate, 1 screw, 1 lock washer, 1 hex nut.
- Order 2 kits per connector.

Shell Size	Layout	Part Number	A ± 0,38 (.015)	B ± 0,38 (.015)	Part Number Kit of 2 each

D110277-4 Rear panel mount version also available

- Kit consists of 1 spring, 1 screw, 1 bracket, 1 lock washer, 1 hex nut.
- Order 2 kits per connector. Front panel mounting.

Jackscrew/Jackpost Assemblies

Refer to the accessories selection guide on pages 6-7 for use with Cannon backshells.

Jackscrew Assembly

- Kit consists of 2 studs, 2 heads, 1 tube retaining compound (US only)
- Order one kit per connector

Part Number: D110550	
Materials and Finishes	
Material:	Stainless Steel
Treatment:	Passivated

Jackpost Assembly

- Kit consists of 2 posts, 2 hex nuts, 2 lock washer
- Order one kit per connector

Part Number: D110551	
Materials and Finishes	
Material:	Stainless Steel
Treatment:	Passivated

NOTE: Jack post is not compatible with rear-panel mount connectors.

Guide Pin Plate

Female

- Useful in blind mate applications.
- Kit consists of 1 plate, 2 screws.
- Guide pin inserts for Size 8 cavities for Combo D® connectors also available. Refer to Combo D catalog.

Dust Cap

Dust caps provide protection from moisture and dust for unused I/O ports.

Product Features

- Dust Caps meet the static decay test requirements of MIL-B- 81705C, Type II.
- Dust Caps have an integral flange for easy application and removal

D-Subminiature Connectors

cannon

Invented by Cannon engineers in 1952 for aircraft radio systems, the D-Subminiature was designed as a smaller, lightweight rectangular alternative to larger, heavier connectors of the time. Today, Cannon continues its legacy of innovation through highly engineered D-Sub connector styles, sizes, configurations and accessories. From rocket launchers and telecommunications, to avionics and high-speed rail, its performance, reliability and versatility have made this Cannon invention one of the most widely used connectors in the world.

Non-Magnetic Series

D*M, D*MM, D*MA with NM, NMB option connectors are used when non magnetic characteristics are required.

D*H

Hermetic Military D connectors are designed to meet environmental conditions of extreme pressure differential.

MIL-DTL-24308²

These high reliability D-Sub connectors are the finest quality and are qualified to MIL-DTL-24308.

D*MAM

D*MAM crimp connectors are designed according to MIL-DTL-24308.

D*MM

D*MM straight PCB connectors are designed according to MIL-DTL-24308.

GD*

GD* connectors provide high-density and moisture protection.

2D

2D connectors feature double the contact density in the same insert area.

D*MA

D*MA crimp connectors are designed according to MIL-DTL-24308

D*M

D*M straight PCB connectors are equivalent to MIL-DTL-24308 qualified versions (except for finishes).

Stainless Steel

A broad range of D-Sub connectors are available with stainless steel shells for corrosion resistance.

D*NG

D*NG pressfit connectors provide a low-cost alternative to traditional through hole solder contacts (straight only).

D*SF

Speedy D connectors terminate ribbon cables without stripping and without splicing.

D*U

D*U is a low-cost, crimp type D-Subminiature series.

D*

D* connectors are available for high performance uses according to DIN 41652.

ZD*

ZD* connectors are available for applications where price is the primary driver.

ZD*A

ZD*A high density connectors are available for applications where price is the primary driver.

D*A

D*A crimp connectors are available for applications where price is the primary driver.

Combo-D

Combo-D connectors offer an industry standard shield I/O interconnect, with the flexibility of a customized special.

ITT

About ITT Cannon

ITT is a diversified leading manufacturer of highly engineered critical components and customized technology solutions for the energy, transportation and industrial markets. Building on its heritage of innovation, ITT partners with its customers to deliver enduring solutions to the key industries that underpin our modern way of life. Founded in 1920, ITT is headquartered in White Plains, N.Y., with employees in more than 35 countries and sales in a total of approximately 125 countries. For more information visit itt.com

ITT's Cannon brand offers a product portfolio that remains one of the most extensive in the industry. Continuous investment in technology, research and investment have enabled us to provide new, innovative solutions to markets including:

- **Commercial Aerospace**
- **Military & Defense**
- **Industrial**
- **Medical**

When you specify an ITT Cannon interconnect solution, you can rely on products designed, developed and manufactured to the highest quality and reliability standards. This tradition of excellence is based on ITT's corporate culture of operating its businesses under the principles of Six Sigma. At ITT, Six Sigma is not just a quality philosophy but a complete corporate culture that drives the entire business. Our Value Based Management and Value-Based Product Development systems are two cornerstones that allow for the development of both leadership and product engineering principles.

Six Sigma Manufacturing

ITT Cannon operates manufacturing facilities in the United States, Germany, Italy, Mexico, China and Japan, all of which have particular product area strengths that allow ITT Cannon to offer a truly global presence to our customers. Our facilities are world class and accommodate full vertical integration, utilizing the latest manufacturing technologies including automated and robotic machining centers, Super Market manufacturing cells, Kanban pull systems, and automated electrical, mechanical, and optical test and inspection equipment. The combination of our manufacturing strength and our advanced manufacturing facilities allows ITT to offer products at market driven prices. Our capabilities, especially in robotics, computerized precision tooling, Kaizen Project Management, Six Sigma tools and testing give ITT the most optimized global manufacturing footprint in the interconnect industry.

The Custom Difference

As an industry leader in harsh environment interconnect applications, ITT's world class engineering teams work directly with our customers to design and develop cost-effective solutions for their applications. In many cases we may modify one of our standard designs to ensure a highly reliable solution where timing is critical. When custom connectors are required, we collaborate with clients and partners with a goal to design the most reliable, cost-effective solution possible. Our engineering and product management teams provide a thorough analysis of proposed solutions, ensuring our customers receive the right solution for their program and application needs.

RoHS Compliance Information

ITT has implemented a strict parts control plan for all ITT electronics plants worldwide that allows the Cannon product portfolio to meet the requirements of the European Union Directive 2002/95/EC better known as the Reduction of Hazardous Substances initiative. As appropriate, specific Cannon products may be ordered with an R prefix number which insures our customers will receive RoHS compliant parts for their commercial electronics applications and equipment. Since most RoHS hazardous substances center around specific metal plating and lead solder coatings, ITT's products for RoHS compliance are available in the following plating finishes: electroless nickel, stainless steel, anodize over aluminum and gold plating. It should be noted that gold plating would be recommended as the replacement for tin-lead solder when ordering board mount connectors.

PRODUCT SAFETY INFORMATION

THIS NOTE MUST BE READ IN CONJUNCTION WITH THE PRODUCT DATA SHEET/CATALOG. FAILURE TO OBSERVE THE ADVICE IN THIS INFORMATION SHEET AND THE OPERATING CONDITIONS SPECIFIED IN THE PRODUCT DATA SHEET/ CATALOG COULD RESULT IN HAZARDOUS SITUATIONS.

1. MATERIAL CONTENT AND PHYSICAL FORM

Electrical connectors do not usually contain hazardous materials. They contain conducting and non-conducting materials and can be divided into two groups:

- a) Printed circuit types and low-cost audio types which employ all plastic insulators and casings;
- b) Rugged, Fire Barrier and High Reliability types with metal casings and either natural rubber, synthetic rubber, plastic, or glass insulating materials.

Contact materials vary with type of connector and application and are usually manufactured from either copper, copper alloys, nickel, alumel, chromel or steel. In special applications, other alloys may be used.

2. FIRE CHARACTERISTICS AND ELECTRIC SHOCK HAZARD

There is no fire hazard when the connector is correctly wired and used within the specified parameters. Incorrect wiring or assembly of the connector or careless use of metal tools or conductive fluids, or transit damage to any of the component parts may cause electric shock or burns. Live circuits must not be broken by separating mated connectors as this may cause arcing, ionization and burning. Heat dissipation is greater at maximum resistance in a circuit. Hot spots may occur when resistance is raised locally by damage (e.g., cracked, or deformed contacts, broken strands of wire). Local overheating may also result from the use of the incorrect application tools or from poor quality soldering or slack screw terminals. Overheating may occur if the ratings in the product data sheets/catalogues are exceeded and can cause breakdown of insulation and hence electric shock. If heating is allowed to continue, it intensifies by further increasing the local resistance through loss of temper of spring contacts, formation of oxide film on contacts and wires and leakage currents through carbonization of insulation and tracking paths. Fire can then result in the presence of combustible materials, and this may release noxious fumes. Overheating may not be visually apparent. Burns may result from touching overheated components.

3. HANDLING

Care must be taken to avoid damage to any component parts of electrical connectors during installation and use. Although there are normally no sharp edges, care must be taken when handling certain components to avoid injury to fingers. Electrical connectors may be damaged in transit to the customers, and damage may result in creation of hazards. Products should therefore be examined prior to installation/use and rejected if found to be damaged.

4. DISPOSAL

Incineration of certain materials may release noxious or even toxic fumes.

5. APPLICATION

Connectors with exposed contacts should not be selected for use on the current supply side of an electrical circuit because an electric shock could result from touching exposed contacts on an unmated connector.

Voltagess more than 30 V ac or 42.5 V dc are potentially hazardous, and care should be taken to ensure that such voltages cannot be transmitted in any way to exposed metal parts of the connector body. The connector and wiring should be checked before making live to ensure that there is no damage to metal parts or insulators, no solder blobs, loose strands, conducting lubricants, swarf, or any other undesired conducting particles. Circuit resistance and continuity check should be made to make certain that there are no high resistance joints or spurious conducting paths. Always use the correct application tools as specified in the data sheets/catalogues. Do not permit untrained personnel to wire, assemble or tamper with connectors. For operation voltage please see appropriate regulations for the applicable region/country.

6. IMPORTANT GENERAL INFORMATION

- (i) Air and creepage paths/Operating voltage. The admissible operating voltages depend on the individual applications and the applicable safety regulations (including, but not limited to, region/country-specific regulations). For this reason, the air and creepage path data are only reference values. A reduction of air and creepage paths due to PC board and/or harnessing is normal.
- (ii) Temperature. All information given are temperature limits. The operation temperature depends on the individual application.
- (iii) Other important information. ITT continuously endeavors to improve its products. Therefore, the products may deviate from the description, technical data and shape as shown in this catalogue and/or data sheets.

7. MISCELLANEOUS

"Cannon" and "Veam" are brands of ITT, Inc. ("ITT"). ITT's connector products are intended to be used in accordance with the specifications in this publication (and any other relevant publications that are applicable to the specific product). Any use or application that deviates from the stated operating specifications is not recommended and may be unsafe. No information and data contained in this publication shall be construed to create any liability on the part of ITT or its successors, assigns, officers, directors, employees, affiliates, and agents, including, but not limited to, any liability for any patent infringements or other rights of third parties which may result from its use. Any new issue of this publication shall automatically invalidate and supersede all previous issues. Reprinting this publication is generally permitted, provided that ITT's prior written consent is obtained, and the source is indicated.

This publication is not to be construed as an offer. It is intended merely as an invitation to make an offer. Product availability, prices, and delivery dates are exclusively subject to ITT's order confirmation form; the same applies to orders based on development samples delivered. Please refer to ITT's Terms and Conditions of Sale located at www.ittcannon.com for the full text of the terms and conditions that apply to ITT's connector products.

Commodities in this catalogue may be controlled for export by the International Traffic in Arms Regulations (ITAR) and Export Administration Regulations (EAR) when specifically designed, modified, or configured for articles controlled by the United States Government.

ITT's Cannon brand is a world leader in the design and manufacture of highly engineered connector solutions for multiple end markets.

Why ITT

ITT is a focused multi-industrial company that designs and manufactures highly engineered critical components and customized technology solutions. ITT's Cannon brand is a leading global manufacturer of connector products serving international customers in aerospace, defense, medical, industrial and transportation end markets. ITT's Connector business, which also includes the Veam and BIW Connector Systems brand, manufactures and supplies a variety of connectors and interconnects that make it possible to transfer data, signal and power in an increasingly connected world.
