# maxiFLOW™ Cross Cut
# High Performance Heat Sinks
with Plastic Push Pin

ATS PART # ATS-1043-C1-R0

Features & Benefits

» For larger heat sinks and higher pre-loads, push pins with compression springs are an effective mounting choice. The push pin has a flexible barb at the end that is designed to engage with a pre-drilled hole in a PWB. The compression spring adds the necessary force to hold the assembly together. Provides better thermal performance than comparable size straight fin and pin fin heat sinks.

» Features proven high performance maxiFLOW™ heat sink spread fin array to maximize cooling surfaces.

» Ideal for tight spaced components where wider heat sinks can't be used.

» Provided with pre-assembled thermal interface material centered on base.

» Nylon pushpin with steel compression spring.

» Reccomended through hole size in PCB is 3.00 mm.
