

## Flyback Transformer For ON Semiconductor NCP1027

The DA2077-AL flyback transformer has been specifically developed for use with ON Semiconductor's NCP1027 Standby Power Supply for ATX Applications and is specified in Application Note AND8241/D.

This transformer is designed for universal input, 85 – 265 Vac. It operates in continuous conduction mode within an input voltage range of 120 Vdc to 375 Vdc and at a 65 kHz switching frequency. Primary to secondary isolation is 2000 Vrms tested for one minute.

Coilcraft can also custom engineer a transformer to meet your specific requirements. For free evaluation samples, contact Coilcraft or visit **www.coilcraft.com**.
