

COMPACT DESIGN

The JHT miniature series Hall effect joystick's compact design and robust construction is the ideal solution where space is limited and precision control is required. Ideal applications include: robotics, construction equipment, hydraulic controls, medical and surgery equipment, security and surveillance video cameras. The JHT has been tested to five million cycles with no degradation of electrical performance or boot wear. Electronics are sealed to IP68S and EMI/RFI immunity are per SAE J1113 specifications. See JHT Z-axis pages for z-axis options.

Features:

- **Compact design excellent for armrest & panel mounting**
- **Proven contactless analog output Hall effect technology**
- **5 million operational cycles in all directions**
- **Electronics sealed per IP68S**
- **Single or omni-directional**
- **Optional pushbutton switch(es) available**
- **RoHS compliant**

***P9'S are not part of the SPI output.

****Outputs LL & MM must be used with termination option 2. Cable termination option only available with LL & MM options.

NOTES:

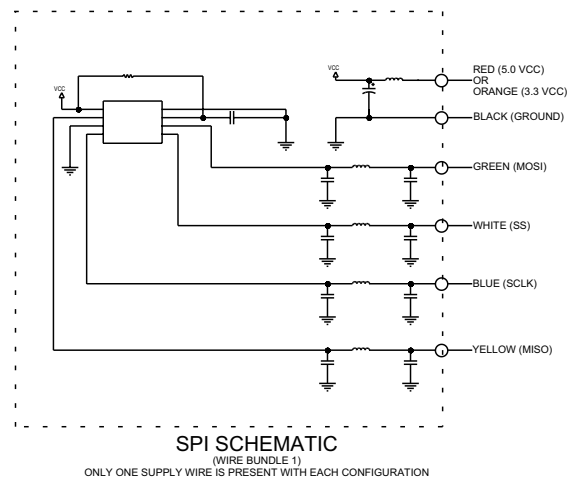

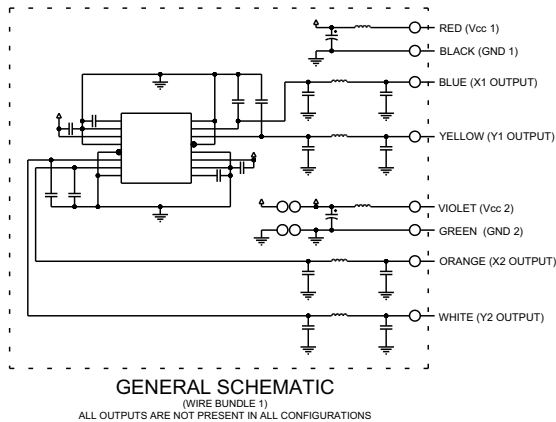

- Outputs are from the center to the full travel position in each direction.
- Options "AA," "BB," "CC," "DD," "EE" and "FF" provide increased voltage in +X, +Y; and decreasing voltage in -X, -Y direction from one output per axis.
- Options "GG" and "HH" provide increasing voltages in all directions (+X, +Y, -X, -Y) from 2 outputs per axis.
- Options "BB" and "EE" provide redundant output 2 which duplicates output 1. Options "CC" and "FF" provide redundant output 2 which is inverse of output 1.
