Essential Analog Efficient Power Toolkit

General Description

The MAXESSENTIAL02EP Essential Analog Efficient Power toolkit delivers products on ready-to-use boards for immediate testing and prototyping. The Essential Analog Efficient Power toolkit features products from the Buck, Boost, Buck-Boost, LDO, and Continua™ product categories. The selection also features nanoPower switching converter and module options.

Features

- Enables Immediate Testing of Nine Different Power Solutions
- Includes nanoPower Buck and Boost Converters and Modules, Buck/Boost Converter, LDOs, and Continua Supercapacitor Backup Power Controller
- Boards Designed to Accept 0.100" (2.54mm) Header Pin Strips for Mounting on Breadboards
- Through Holes Accept Test Points for Connecting to Benchtop Equipment

Quick Start

Required Equipment

- DC power supply with 2.5V, 1A output (MAX38889)
- DC power supply with 3.6V, 1A output (for all other devices)
- One voltmeter
- Four banana-to-clip cables

Procedure

- 1) Connect the power supply between the IN and nearest GND terminal posts. A voltage range is specified on the MAXESSENTIAL02EP kit board.
- 2) Board will be set with a default voltage specified on the board.
- 3) Connect the voltmeter to check the output voltage.
- 4) Repeat steps 1 to 3 for the MAX38889. VSYS is the IN and is also the OUT. Connect the power supply and voltage meter to VSYS. When the power supply is removed, the MAX38889 continues to output a voltage.

[Ordering Information](#) appears at end of data sheet.

Setup

Detailed Description of Hardware

MAXM38643A

The MAXM38643A is featured in the efficient power edition of the Essential Analog toolkit, MAXESSENTIAL02EP#. This small board provides a quick examination and testing

of the MAXM38643A, a tiny 1.8V to 5.5V input, 330nA IQ, 1A, 600mA nanoPower buck module. The board design and layout follow standard part recommendations. Refer to the product data sheet at www.maximintegrated.com/maxm38643 for more information. Use the product evaluation kit to examine the product thoroughly.

MAX38889

The MAX38889 is featured in the efficient power edition of the Essential Analog toolkit, MAXESSENTIAL02EP#. This small board provides a quick examination and testing of the MAX38889, 2.5V–5.5V, 3A reversible buck/boost

regulator for backup power applications. The board design and layout follow standard part recommendations. Refer to the product data sheet at www.maximintegrated.com/max38889 for more information. Use the product evaluation kit to examine the product thoroughly.
