

No-Opto Isolated Flyback Converter for PSE Applications

DESCRIPTION

Demonstration circuit 1860B is an isolated flyback converter featuring the LT3748. This demo circuit is designed for Power Sourcing Equipment (PSE) applications with a 52.5V output from a 10V to 15V DC input, with nominal input voltage of 12V. The output current is from 0mA to 700mA, and is capable of a maximum short period overload current of 900mA. Table 1 summarizes the performance of the demo board. This demo circuit can also be easily modified for different PSE applications with some pre-designed transformers.

The LT3748 is a high input voltage isolated flyback controller operating with input supply voltages from 5V to 100V, and 1.9A average gate drive source and sink current. The LT3748 utilizes boundary mode operation to provide a high

efficiency, small size solution with improved regulation. The part senses the isolated output voltage directly from the primary side flyback waveform during the off time of the power switch. No third winding, opto-coupler, or signal transformer is required for regulation.

The LT3748 data sheet gives a complete description of the part, operation and application information. The data sheet must be read in conjunction with this quick start guide for demo circuit 1860B.

Design files for this circuit board are available at <http://www.linear.com/demo>

PERFORMANCE SUMMARY (T_A = 25°C)

PARAMETER	CONDITIONS	MIN	TYP	MAX	UNITS
Input Voltage Range		10	12	15	V
Output Voltage	V _{IN} = 10V – 15V I _{OUT} = 0V – 700 mA	50	52.5	55	V
Maximum Output Current	V _{IN} = 10V – 15V	700			mA
Minimum Output Current	V _{IN} = 10V – 15V			0	mA
Output Voltage Ripple (Peak to Peak)	V _{IN} = 10V – 15V, I _{OUT} = 0 – 700mA		150		mV
Efficiency	V _{IN} = 13.2V, I _{OUT} = 700mA		87.8		%

QUICK START PROCEDURE

Demo circuit 1860B is easy to set up to evaluate the performance of the LT3748. Refer to Figure 1 for proper equipment setup and follow the procedure below.

1. With power off, connect the input power supply to the board through V_{IN} (E1) and GND (E2) terminals.
2. Connect the load to the terminals V_{OUT}^{+} (E6) and V_{OUT}^{-} (E7) on the board.
3. Turn on the power at the input. Increase V_{IN} slowly to 10V.

NOTE: Make sure that the input voltage does not exceed 15V. If higher operating voltage is required, power components with higher voltage ratings should be used.

4. Check for the proper output voltages. The output should be regulated at 52.5V ($\pm 5\%$).

NOTE: The LT3748 requires minimum load to maintain good output voltage regulation. A zener diode D1 together with preload resistors R2, R14, R15 and R16 are placed in the output to clamp the output voltage to ~52.5V without

ex-board preload requirement. The efficiency is higher than 90% without the preload resistors, but the output may exceed 57V under no load or transient condition.

5. Once the proper output voltage is established, adjust the input voltage and load current within the operating range and observe the output voltage regulation, ripple voltage, efficiency and other parameters.

NOTE: When measuring the input or output voltage ripples, care must be taken to avoid a long ground lead on the oscilloscope probe. Measure the input or output voltage ripple by touching the probe tip directly across the terminals of the input or output capacitor. See Figure 2 for proper scope probe technique.

NOTE: A gate resistor of less than 10Ω can be added to the demo circuit to slow down the turning off of the switch, and reduce the switching node voltage spike. A RC snubber can be added as well to the primary winding of the transformer to damp the spike and reduce the EMI.

DEMO MANUAL DC1860B

DEMONSTRATION BOARD IMPORTANT NOTICE

Linear Technology Corporation (LTC) provides the enclosed product(s) under the following **AS IS** conditions:

This demonstration board (DEMO BOARD) kit being sold or provided by Linear Technology is intended for use for **ENGINEERING DEVELOPMENT OR EVALUATION PURPOSES ONLY** and is not provided by LTC for commercial use. As such, the DEMO BOARD herein may not be complete in terms of required design-, marketing-, and/or manufacturing-related protective considerations, including but not limited to product safety measures typically found in finished commercial goods. As a prototype, this product does not fall within the scope of the European Union directive on electromagnetic compatibility and therefore may or may not meet the technical requirements of the directive, or other regulations.

If this evaluation kit does not meet the specifications recited in the DEMO BOARD manual the kit may be returned within 30 days from the date of delivery for a full refund. THE FOREGOING WARRANTY IS THE EXCLUSIVE WARRANTY MADE BY THE SELLER TO BUYER AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED, IMPLIED, OR STATUTORY, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. EXCEPT TO THE EXTENT OF THIS INDEMNITY, NEITHER PARTY SHALL BE LIABLE TO THE OTHER FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES.

The user assumes all responsibility and liability for proper and safe handling of the goods. Further, the user releases LTC from all claims arising from the handling or use of the goods. Due to the open construction of the product, it is the user's responsibility to take any and all appropriate precautions with regard to electrostatic discharge. Also be aware that the products herein may not be regulatory compliant or agency certified (FCC, UL, CE, etc.).

No License is granted under any patent right or other intellectual property whatsoever. **LTC assumes no liability for applications assistance, customer product design, software performance, or infringement of patents or any other intellectual property rights of any kind.**

LTC currently services a variety of customers for products around the world, and therefore this transaction **is not exclusive**.

Please read the DEMO BOARD manual prior to handling the product. Persons handling this product must have electronics training and observe good laboratory practice standards. **Common sense is encouraged.**

This notice contains important safety information about temperatures and voltages. For further safety concerns, please contact a LTC application engineer.
