#### Features

Wide IF Bandwidth: DC - 3.5 GHz Image Rejection: 30 dB LO to RF Isolation: 35 dB High Input IP3: +25 dBm Hermetically Sealed Module Field Replaceable SMA Connectors -55 to +85 °C Operating Temperature

### **General Description**

The HMC-C044 is a passive I/Q MMIC mixer housed in a miniature hermetic module which can be used as either an Image Reject Mixer or a Single Sideband Upconverter. The module utilizes two standard Hittite double balanced mixer cells and a 90 degree hybrid fabricated on a GaAs MESFET process. A low frequency quadrature hybrid was used to produce a 100 MHz USB IF output. This MMIC based module is a more reliable and consistent alternative to hybrid style I/Q Mixers and Single Sideband Converter assemblies. The module features removable SMA connectors which can be detached to allow direct connection of the I/O pins to a microstrip or coplanar circuit.

### **Pin Descriptions**

Pin Number	Function	Description	Interface Schematic	
1	RF	This pin is AC coupled and matched to 50 Ohms.	RF ○	
2	IF1	This pin is DC coupled. For applications not requir- ing operation to DC, this port should be DC blocked externally using a series capacitor whose value has		
3	IF2	been chosen to pass the necessary IF frequency range. For operation to DC, this pin must not source/ sink more than 3 mA of current or part non-function and possible part failure will result.		
4	LO	This pin is AC coupled and matched to 50 Ohms.
