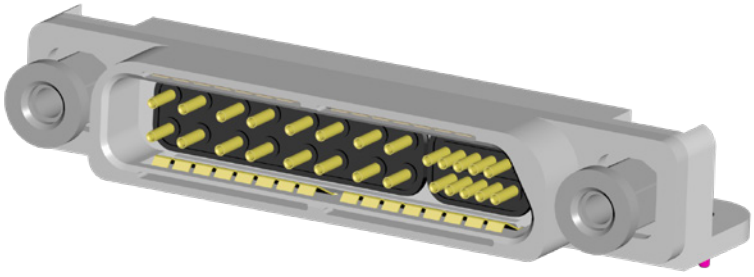
microQUAD™

AirBorn introduces a Micro-D, multi-gigabit, high-speed connector designed to meet the performance requirements of MIL-DTL-83513, where applicable. This rugged connector system is designed to handle LVDS serial bus signals like Ethernet, serial rapid IO, etc. This versatile product has a range from one to ten high-speed modules and up to fifty signal contacts making it ideal for most high-reliability applications.



microQUAD™

MMHS – Cable I/O (Male)

MMHS cable connectors are used in cable applications where both signal and quadrax modules are desired. These connectors come with a variety of wiring and hardware options and all cable connectors are available in custom lengths.

microSI™

The AirBorn microSI product line is designed to meet requirements for high-speed/signal integrity applications while still delivering the reliability customers have come to expect from AirBorn. MicroSI delivers flexibility by design, offering vertical board-mount, right angle board-mount, and cable I/O configurations supporting 1X, 4X, and 8X 100 Ω and 85 Ω differential serial buses. Its balanced design limits skew within pairs. The MIL-DTL-83513 (Micro-D) qualified contact system and metal shells ensure ruggedness and durability.

NOTES

1. Overall braid and/or Halar® will be 1.0 ± 0.5 inches shorter than specified wire length. Minimum length without overall braid or Halar® is 3 inches. If overall braid or Halar® is specified the minimum length is 6 inches.
2. All microSI females have fluorosilicone interfacial seals installed.

☒ Option not RoHS-compliant

* Left or right polarization is determined by looking at the male interface with the LONG SIDE downward. Polarization matches the angled side. Sidebands are on the non-angled side.

** Captivated hardware is factory-installed and non-removable.

*** Factory-installed and non-removable.

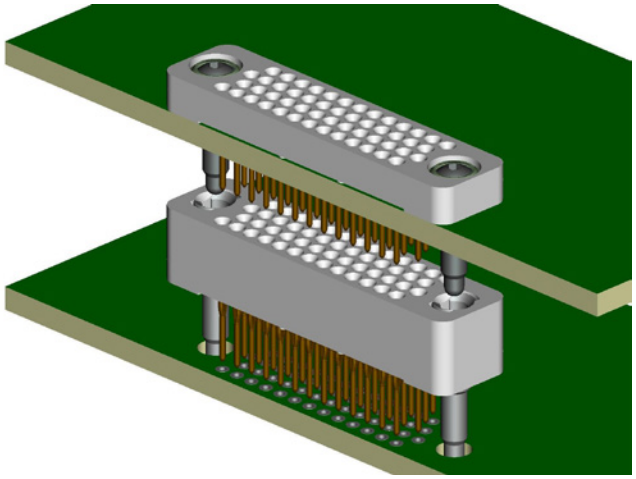
RC™

The AirBorn stackable compliant connector family is one of AirBorn's solutions for high-density, board-to-board stacking applications. This connector family is available in 0.075" contact spacing and 100 Ω and 85 Ω differential serial buses.

- **Wide variety of standard pin/tail lengths accommodate any board-to-board spacing**
- **0.075" contact spacing**
- **Reliable "eye of the needle"-compliant section design eliminates soldering**
- **BeCu contacts (special high-conductivity, high-temperature alloy)**
- **Very robust socket contact (low-stress design)**
- **Individually repairable contacts**



HRC™

RC422 - Full Profile Board-to-Board Stackable Connector

Contact spacing: 0.075″ (1.91 mm)

A full bodied high-density press-fit connector. Uses a patented female/compliant/male stacking contact system. Used in board-to-board stacking applications.

MATED HEIGHT

The connector body height is 0.300” and, when used with the -20 or -30 (0.270”) contact, the mounting is flush (board-bottom-mounted to connector top). This board-bottom to connector-top spacing can be modified based on the contact selected by approximately the difference in pin length (see Table 2 in top window).

MATED HEIGHT

The connector body height is 0.300" and, when used with the -20 or -30 (0.270") contact, the mounting is flush (board-bottom-mounted to connector top). This board-bottom to connector-top spacing can be modified based on the contact selected by approximately the difference in pin length (see Table 2 in top window).

MATED HEIGHT

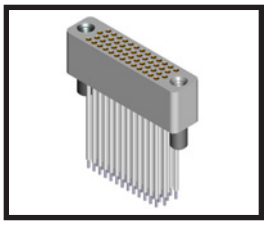
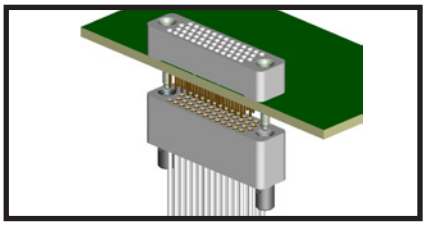
Connector body height is 0.475” and is designed to mount flush to the board bottom of the mating connector.





NOTES

1. The RC4B2 connector is designed to mate with an RC422 connector using contact option -21 (0.270” long) and -39MT hardware. This contact length and hardware combination assures proper connector mating when using boards having a thickness of 0.058”–0.125”.
2. When guide hardware is required on the RC4B2 connector, use hardware option -3900 on the mating connector.
3. When jacksocket hardware is required on the RC4B2 connector, use hardware option -39MT on the mating connector.

Determining the Required Temination Lead Length

To calculate the required termination lead length, use the example below. Measurements listed are in inches.

Dimension A = 0.720
0.720 – 0.300 (insulator height) = 0.420
0.420 + 0.114 (minimum pin engagement) = 0.534
0.420 + 0.214 (maximum pin engagement) = 0.634

In this example, the termination option to choose is 0.600 lead length.

The contact termination option will be a length that falls between the calculated numbers resulting from using the minimum and maximum pin engagement.

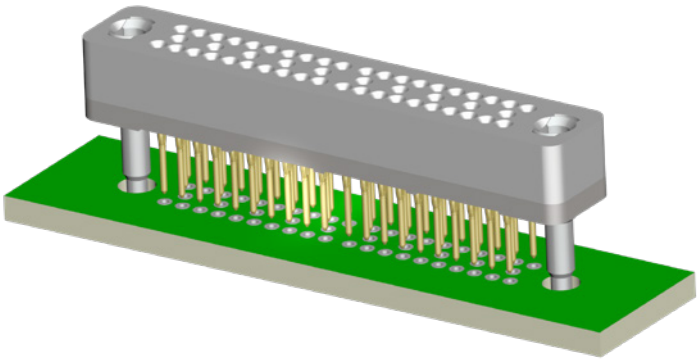
RCII™

The AirBorn stackable compliant connector family is one of AirBorn's solutions for high-density, board-to-board stacking applications. This connector family is available in 0.075" contact spacing and 100 Ω and 85 Ω differential serial buses.

- **Wide variety of standard pin/tail lengths accommodate any board-to-board spacing**
- **0.075" contact spacing**
- **Reliable "eye of the needle"-compliant section design eliminates soldering**
- **BeCu contacts (special high-conductivity, high-temperature alloy)**
- **Very robust socket contact (low-stress design)**
- **Individually repairable contacts**



RCII™

RC324 - 3-Row Bottom-of-Stack Board Mount Connector with SI

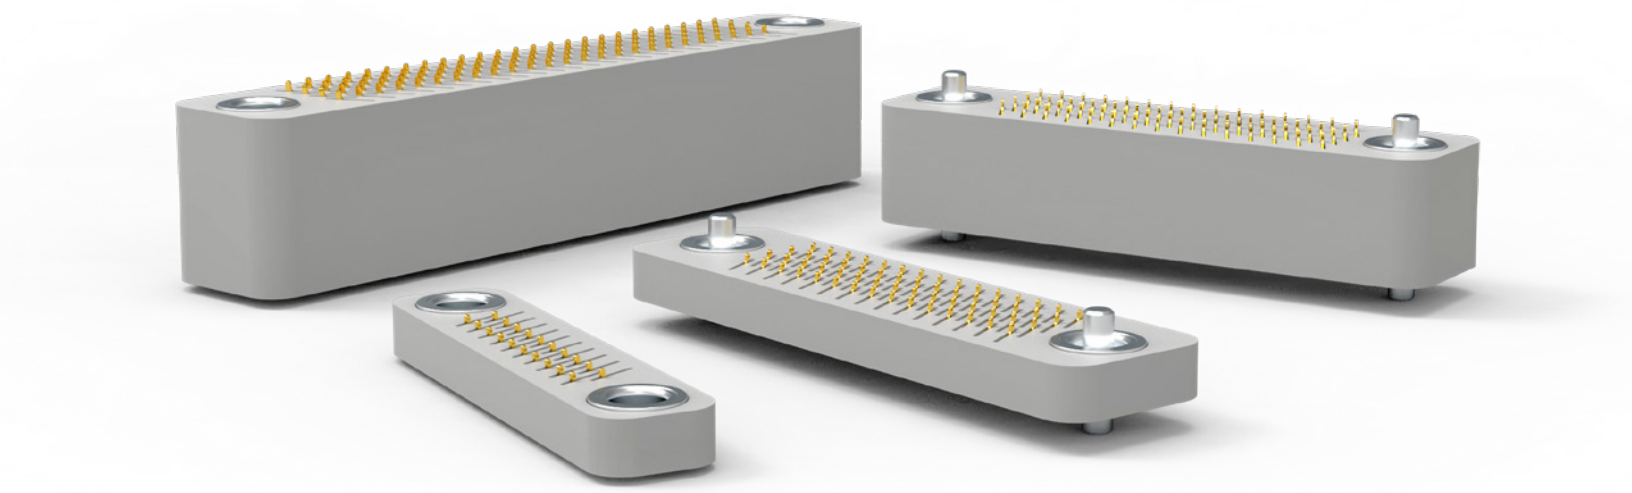
Z Series

The Z Series family of high-density, board-to-board or flex circuit stacking applications is unique, offering users a reliable one-piece contact system. Its solder-less interconnect is compressed or "sandwiched" under pressure between parallel printed wiring boards or between a printed wiring board and other electronic components such as an IC or multichip module.

- **0.050" staggered grid array**
- **Up to 400 contacts per square inch**
- **BeCu contacts for reliable mating**
- **Standard heights from 0.100" to 0.350"**
- **Custom configurations available to meet your specific design needs.**



Z Series

Vertical Compression (Z-axis), Open-Pin Field

Contact spacing: 0.050" (1.27 mm)

A high-density, open-field, vertically-compressed connector utilizing a patented z-axis contact system configured for between-board (board-to-board) compression applications.

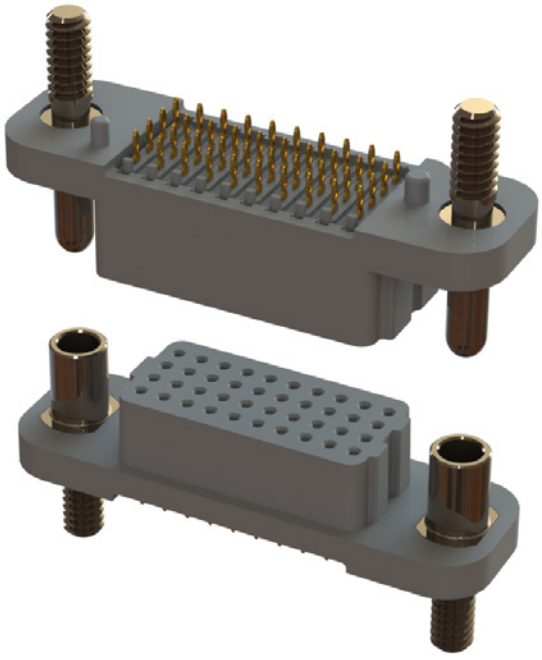
verSI™

The AirBorn verSI (versatile connectors with high-speed signal integrity) open-pin field product line is designed to meet the requirements for high-speed/high-density/signal integrity 100 Ω and 85 Ω differential serial bus applications while still delivering the reliability customers have come to expect from AirBorn.



versi™

VSM – Vertical (Male)

Pitch: 1.27 mm

VSM signal-integrity connectors are used in vertical, PCB-mount applications where a male interface is required. Termination styles include press-fit, paste-in-hole, plated thru-hole, and surface-mount.

FEATURES

verSI board-mount connectors feature low mating force/high-reliability contact system with four points of contact. The open-pin field design allows for flexibility in termination schemes. Single-ended, differential pair, power, and ground are all available in one connector design. Guide hardware is optional.

NOTES

All VRW part numbers are non-RoHS-compliant.

Wire colors per M83513 are ten (10) solid colors, repeating.

Per M83513, corrosion has been experienced on connectors that are pre-wired with 22759/33 and stored in sealed environments. Caution should be exercised when using this wire.
