

## PCB1325.4, Pt Temperature Sensor according to DIN EN 60751

Temperature range -40 °C to +150 °C

- Pt chip mounted on a PCB board
- Easy connection to cables via solderable connection pads
- Quick & economical temperature probe assembly
- Connection pads on opposite surfaces; zero short-circuit risk
- High accuracy and interchangeability of a platinum sensor
- Available in large volumes

The PCB 1325.4 sensor consists of a Pt-RTD mounted on a small PCB board. Originally designed for the stringent precision and stability requirements of calorimetry applications, the board design simplifies the connection and assembly process in probe assemblies. The unique "heat break" conductive path reduces heat transport from the connection wires to the sensor, minimizing stem effect measurement error.
