AC-DC Power Supplies Bus Converter · Power Module Type

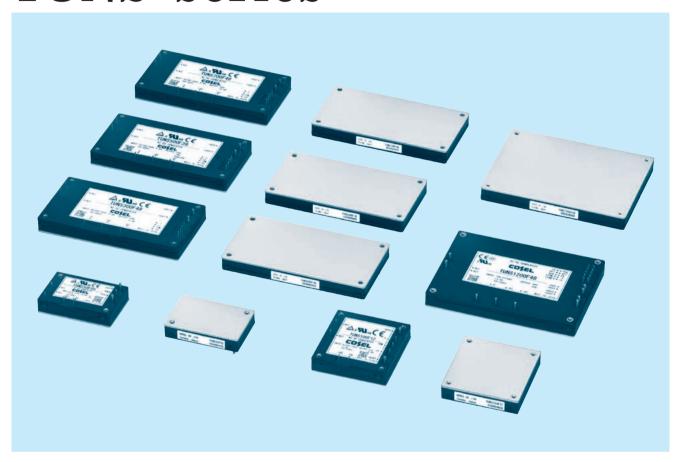

TUNS-series

Feature

AC-DC Power Module Type Converter

Harmonic attenuator (Complies with IEC61000-3-2 class A)

Thin and small size

Built-in overcurrent, overvoltage and thermal protection circuits

Mounting hole (M3 tapped)

<TUNS50F/100F/300F/500F/700F>

Universal input 85 - 264VAC

Peak current (TUNS500F)

<TUNS1200F>

Wide input 85 - 305VAC

For medical electric equipment

Constant current regulation

Output voltage can be varied to near 0V

Parallel operation possible

CE marking

Low voltage directive RoHS Directive

UKCA marking

Electrical Equipment Safety Regulations RoHS Regulations

Safety Approval

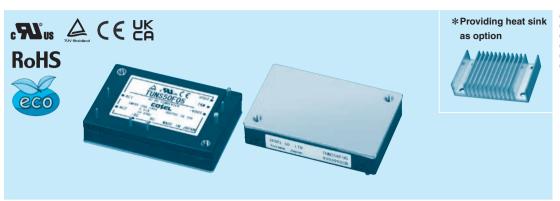

UL60950-1, C-UL, EN62368-1 (TUNS50F/100F/300F/500F/700F) UL62368-1, C-UL, EN62368-1 (TUNS1200F) ANSI/AAMI ES60601-1, EN60601-1 3rd (TUNS1200F)

■ 5-year warranty

Optional parts

Heat sink

50

①Series name ②Single output ③Output wattage ④Universal Input

⑤Output voltage

(a) Optional
T: with Mounting hole
(\$\phi 3.4 \text{ thru})

- *Avoid short circuit between +BC and -BC. It may cause the failure of inside components.
- *Keep TRM open, if output voltage adjustment is not necessary.

No.	Pin Connection	Function		
8	-M	Output voltage maniter terminal		
9	+M	Output voltage monitor terminal		
10	NC	No connection		

Other than the above are the same as standard products.

TUNS1200F

No.	Pin Connection	Function			
1	AC1	AC input			
2	AC2	AC input			
3	R	External resistor for inrush current protection			
4	+BC	+BC output			
5	-BC	-BC output			
67	+VOUT	+DC output			
89	-VOUT	-DC output			
10	+S	Remote sensing (+)			
11)	-S	Remote sensing (-)			
12	CB	Current balance			
13	RC2	Remote ON/OFF ground			
14)	PGG	Power good output ground			
15)	ITRM	Adjustment of output current			
16	VTRM	Adjustment of output voltage			
17)	AUX	Auxiliary output			
18	RC1	Remote ON/OFF			
19	PG	Power good output			
_	FG	Mounting hole (FG)			

Implementation • Mounting Method

Mounting method

- ■Use with the conduction cooling (e.g. heat dissipation from the aluminum base plate to the attached heat sink).
- ■Use a heat sink that larger than the power supply and has a large thickness so that the alminum base plate can be cooled uniformly.
- ■The unit can be mounted in any direction. When two or more power supplies are used side by side, position them with proper intervals to allow enough air ventilation. Aluminum base plate temperature of each power supply should not exceed the temperature range shown in
- ■Avoid placing the AC input line pattern layout underneath the unit. It will increase the line conducted noise. Make sure to leave an ample distance between the line pattern layout and the unit. Also avoid placing the DC output line pattern underneath the unit because it may increase the output noise. Lay out the pattern away from the unit.
- ■Avoid placing the signal line pattern layout underneath the unit because the power supply might become unstable. Lay out the pattern away from the unit.
- ■High-frequency noise radiates directly from the unit to the atmosphere. Therefore, design the shield pattern on the printed circuit board and connect it to FG or -BC. The shield pattern prevents noise radiation.
- ■When a heat sink cannot be fixed on the base plate side, order the power module with "-T"option. A heat sink can be mounted by affixing a M3 tap on the heat sink. Please make sure a mounting hole will be connected to a grounding capacitor CY.

		Mounting hole		
ĺ	Standard	M3 tapped		
ĺ	Optional : -T	φ 3.4 thru		

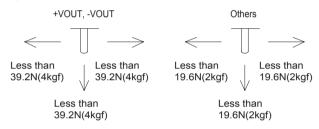

Stress onto the pins

- ■When too much stress is applied to the pins may damage internal connections. Avoid applying stress in excess of that shown in right figure.
- ■The pins are soldered onto the internal PCB. Therefore, Do not bend or pull the leads with excessive force.
- ■Mounting hole diameter of PCB should be 3.5mm to reduce the stress to the pins.
- ■Fix the unit on PCB (fixing fittings) by screws to reduce the stress to the pins. Be sure to mount the unit first, then solder the unit.

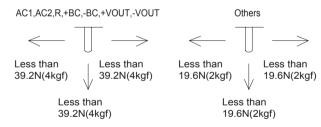

Soldering temperature

■Flow soldering : 260°C for up to 15 seconds. ■Soldering iron (26W) : 450°C for up to 5 seconds.

Derating

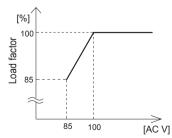

Input voltage derating curve

TUNS50F/100F

TUNS700F/1200F

*TUNS1200F12 has no input voltage derating.

TUNS300F/500F

*TUNS300F/500F has no input voltage derating.

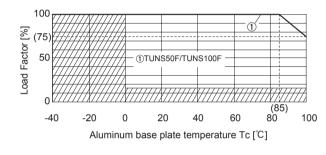

Derating

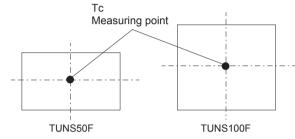

Output voltage derating curve

- ■Use the power modules with conduction cooling (e.g. heat dissipation from the aluminum base plate to the attached heat sink).

 Below shows the derating curves with respect to the aluminum base plate temperature. Note that operation within the hatched areas will cause a significant level of ripple and ripple noise.
- ■Please measure the temperature on the aluminum base plate edge side when you cannot measure the temperature of the center part of the aluminum base plate. In this case, please take 5deg temperature margin from the derating characteristics shown in below. Please reduce the temperature fluctuation range as much as possible when the up and down of the temperature are frequently generated. Contact us for more information on cooling methods.

Instruction Manual

◆ It is neccessary to read the "Instruction Manual" and "Before using our product" before you use our product.

https://www.cosel.co.jp/redirect/catalog/en/TUNS/ Instruction Manual Before using our product https://en.cosel.co.jp/technical/caution/index.html

Basic Characteristics Data

Model	Circuit method	Switching Input frequency current [kHz] [A] *1		Inrush current	PCB/Pattern		Series/Parallel operation availability		
			protection circuit	Material	Single sided	Double sided	Series operation	Parallel operation	
TUNS50F	Active filter	80-600	0.67	Thermistor	Aluminum	Yes		Yes	*2
1011330F	Flyback converter	100-300		THEITHISTOL	Alullillulli				
TUNS100F	Active filter	80-600	1.3	Theyneisten	Alumaimuma	Yes		Yes	*2
10113100F	Forward converter	300		Thermistor	Aluminum				
TUNCOOF	Active filter	100	3.6	SCR	Aluminum	Yes		Yes	*2
TUNS300F	Half-bridge converter	400							* 2
TUNCEOOF	Active filter	100	6.0	SCR	Aluminum	Yes		Yes	*2
TUNS500F	Half-bridge converter	400		SUR					
TUNCZOOF	Active filter	100	8.6	000	A l	Yes		\/	dh O
TUNS700F	Half-bridge converter	400		SCR	Aluminum		Yes	*2	
TUNCADOC	Active filter	100	14	SCR	Aluminum	Yes		Vaa	Yes
TUNS1200F	Full-bridge converter	400						Yes	

^{*1} The value of input current is at ACIN 100V and rated load.

^{*2} Refer to instruction manual.
