Stop Strength: 5 in-lbs minimum

Relative Humidity: 90-95% at 40°C for 240 hours (MIL-STD-202 Method 103, Test Condition A)
Thermal Cycling: per MIL-STD-202, Method 107, Test Condition A, with an exception of -65°C as the low temperature

 Shaft and Panel Seal
All switches are provided with a shaft and panel seal.

OPTIONS
Adjustable Stop Switches
The switch may have continuous rotation, or be adjusted to limit the rotation. The panel seal ring can be removed to expose the stop pin holes on the front of the switch. Two stop pins and panel seal o-ring are supplied with the switch. One or both may be used to limit the rotation as desired.

Custom encoders with options such as custom code output, 1/4" shaft diameter, factory set stops and longer shaft terminal lengths are available.
