LEO-D51

5.65" ePaper Display with Sub-1GHz Communication

NEW

Features

- 5.65" ePaper display with black, white, and red ink
- Sunlight-readable display with 180-degree viewing angle
- Supports data transmissions via Sub-1GHz communication
- Display tags for roaming and location positioning applications
- Cableless design ensures quick installation
- Battery supports operation for 2 years (10 updates per day)
- Equipped with a display fastener for various fixed solutions

Introduction

LEO-D51 is an ePaper display that represents a new generation of environmentally friendly products. Designed to replace printed paper, the LEO-D51 ePaper display is a low-power information display solution equipped with Sub-1GHz communication that allows the display content to be synchronously updated. The embedded Sub-1GHz protocol offers excellent signal penetration for long-range transmissions and supports roaming for positioning applications. Moreover, with its minimal power consumption, the LEO-D51 ePaper display is ideal for IoT applications, such as factory production carts, hospital beside displays, and conference room door displays.

Specifications

|	
Display Size	5.65"
