High Retention USB to RS-422/485 Converters

Features

- Converts USB to RS-422/485 adding 1 or 4 ports to PCs
- Optical isolation protection from voltage spikes and ground loops
- High retention USB ports hold connections securely (by model)
- USB 2.0 (backward compatible)
- Up to 921.6 kbps serial data rate (by model)
- Up to 12 Mbps USB data rate (by model)
- Inline, panel and DIN rail mount options
- USB port or external powering options
- USB cable included with all models

Introduction

Advantech industrial features and specifications support USB convenience on the factory floor: "High-Retention USB Ports" are 50% stronger than regular USB ports to securely grip standard USB cables in demanding applications. "Port-to-Port isolation" protects the upstream device from downstream devices and downstream devices from each other ensuring ground loops or surges cannot be transferred through Port 1 to a device connected to Port 2. "Locked Serial Number" uses the same serial number associated with the converter model so, if the converter is shared by field service laptops, a locked serial number lets you plug-and-play without matching.

ULI-340 Series Selection Guide

High Retention USB to RS-422/485 Converters

Common Features

- Converts USB to RS-422/485
- Optical isolation protection
- High retention USB ports hold connections securely
- USB 2.0 (backward compatible)
- Up to 921.6 kbps serial data rate (by model)
- Up to 480 Mbps USB data rate (by model)
- Inline, panel and DIN rail mount options
- USB port or external powering options
- USB cable included with all models
