

RJ point five Connector System

Stewart Connector's RJ *point five* connector System, the next generation Ethernet link, provides nearly double the port density when compared to standard RJ45 connector and cabling solutions.

Ideal for OEM's and systems integrators seeking to increase density while also reducing the cost-per-port price point. The RJ *point five* connector and cable system provides the convenience of a single connector per channel solution for maximum port flexibility and efficiency.

Stewart Connector's Dual Port RJ *point five* and single port RJ *point five* connector systems currently support 1GBase-T Ethernet speeds for CAT5e cabling. Both RJ *point five* connector systems also support POE+ capabilities for mobile and remote applications. To learn more visit **stewartconnector.com**

Specifications

- 7 mm centerline port spacing
- Supports CAT5e cabling specifications
- LED light transmission directly through the cable plug
- Conductors: 24 AWG, 7/32 stranded

- Integrated cable strain relief and plug shield
- Pull tab for easy removal
- Maximum height of shielded single ports is 0.330" (8.37mm)
