BCL25-700-8

22/25 kW Liquid Cooled On-Board Battery Charger

The Bel Power Solutions BCL25-700-8 is a 22/25 kW bi-directional liquid-cooled on-board inverter battery charger with export functionalities for hybrid (HEV) or full electric (EV) vehicles.

With the BCL25-700-8, it is possible to connect this inverter charger directly to an EVSE charging station or for connection directly to the public grid (Single-Phase 190 – 264 VAC or Three-Phase 330 – 528 VAC) to charge the HV batteries.

The output voltage covers a wide variety of HV batteries in the range from 240 VDC to 800 VDC with constant output current of 60 A. When not running from the engine, but from the HV batteries, up to 22/25 kW can be exported to power three-phase AC equipment.

RoHS Compliant
