

J-Type Connectors

The Cinch Advantage

Cinch J-Type connectors are used in Europe, mainly in industrial applications where heavy impact forces are expected. The J-Type connectors incorporate a resilient 12 finger contact. The 12 finger socket contact engages with each flat plug pin to provide low contact resistance, high current carrying capacity and minimum insertion and withdrawal forces. These special features help to provide a thoroughly reliable connector, enhanced by MK. 2 shells moulded in grey high impact thermoplastic for appearance and durability. No. 4 thread cutting screws with Pozidriv heads are provided loose for assembly of plugs/sockets into MK. 2 shells. For uniformity Pozidriv headed screws are now supplied for cable clamp adjustments.

Features

- 12 finger socket resilient contacts
- MK. 2 shells moulded in high impact thermoplastic
- 4, 8, 12, and 20 connector sizes
- Robust connector series

Materials & Finishes	
Mouldings	High impact thermoplastic - grey
Plug blades	Brass - tin plated
Socket contacts	Copper alloy - tin plated
Shells	High impact thermoplastic colour - grey

T 1 : 10 :	
Technical Data	
Number of contacts	4, 8, 12, 20
Working voltage	900 volts - DC or AC peak
Current rating	5 Amps
Voltage proof	3k volts between contacts and 2.8 k volts between contacts and frame DC or AC peak
Contact resistance	5 milliohms
Insulation resistance	5,000 megohms minimum
Temperature range	-40°C to +100°C
Mating cycles	250
