

# Patch Panel

Bel's lightweight Patch Panel is manufactured using an aluminum alloy and features a 0.5 U design to provide additional space. The panel fits all industry-standard 19-inch racks and cabinets and has a hinged management bar to help with organization. There are 24 ports with silkscreened port numbers and extra space for notes. The patch panel construction consists of die-cast aluminum and UL 94V-0 fire retardant plastic and is UL 1863 safety listed. Each package includes an attachment kit.

## Features & Benefits

- Lightweight aluminum alloy body
- 0.5 U design provides more space
- Fits all industry-standard 19 inch racks and cabinets
- 24-port density in only 0.5 U of rack space
- UL 94V-0 fire retardant plastic

## Applications

- IoT applications
- Data Centers
- Telecom

## Part Numbers

| Part Number  | Physical Dimensions   |
