

Description

Single pole and multipole thermal-magnetic miniature circuit breakers (MCBs) in accordance with EN 60947-2, UL 1077 and UL 489 for DIN rail mounting, with toggle actuation, visual status indication and high rupture capacity. A positively trip-free snap action mechanism ensures reliable switching behaviour. A range of trip characteristics and add-on modules allow a great variety of applications.

Typical applications

Protection of cables, motors, generators and transformers, thyristors and silicon rectifiers. Protection of computers and their peripheral equipment, industrial process control systems, telecommunications equipment, power supplies.

DC application

When using the 4230-T in DC application, polarity does not have to be observed. Max. acceptable voltage between the conductors depends on the number of poles, circuitry and relevant standard / approval.

To IEC/EN 60947-2:

To UL 489 and UL 1077:

All dimensions without tolerances are for reference only. E-T-A reserves the right change specifications at any time in the interest of improved design, performance and cost effectiveness, the right to make changes in these specifications without notice is reserved. Product markings may not be exactly as the ordering codes. Errors and omissions excepted.

Description

Add-on module for circuit breaker type 4230-T. The auxiliary switch has a change-over contact as signal contact and is operated with actuation of the MCB.

Typical applications

Status monitoring of MCB and/or the connected loads.

Mounting

The add-on module is mounted on the left side of the MCB (seen from the front). For mounting, the MCB has to be in the OFF position.

Mounting instructions

Mounting to MCB to UL 489

The following steps have to be carried out for mounting the auxiliary contact module:

- Remove the left-side covers for the latching notches of the auxiliary contact module on both isolation pieces of the MCB, e.g. by means of a screw driver
- Pull off the isolation pieces from the MCB to the front
- Remove blanking plug on MCB to open left-side holes for latching notches of auxiliary switch
- Re-insert isolation pieces onto MCB
- Pull off left-side adhesive cover and carefully remove the perforated cover below

Caution: the MCB to UL489 must only be operated with the insulation pieces fitted.

Schematic diagrams

Note:

As soon as the auxiliary contact module is mounted on the MCB, the terminals 11 and 14 are connected when the MCB is in ON condition. Terminals 11 and 12 are connected when the MCB is in OFF condition.

Mounting principle

Description

Add-on module for MCB type 4230-T. The fault indicator has a change-over contact as signal contact. There will only be a signal when the MCB tripped on grounds of a failure (overload, short circuit), but not when the MCB was switched on or off manually. By actuating the reset lever on the front the tripping signal is acknowledged.

Typical applications

Status monitoring of MCB and/or the connected loads.

Mounting

The add-on module is mounted on the left side of the MCB (seen from the front). For mounting, the MCB has to be in the OFF position.

Mounting instructions

Mounting to MCB to UL 489

The following steps have to be carried out for mounting the fault indicator module:

- Remove the left-side covers for the latching notches of the fault indicator module on both isolation pieces of the MCB, e.g. by means of a screw driver
- Pull off the isolation pieces from the MCB to the front
- Remove blanking plug on MCB to open left-side holes for latching notches of indicator switch
- Re-insert isolation pieces onto MCB
- Pull off left-side adhesive cover and carefully remove the perforated cover below

Caution: the MCB to UL489 must only be operated with the insulation pieces fitted.

Schematic diagrams

Note:

As soon as the fault indicator module is mounted on the MCB, the terminals 912 and 92 are connected when the MCB is in ON condition; the terminals 91 and 94 are connected when the MCB tripped electrically; the terminals 91 and 92 are connected when the MCB was tripped manually; at the same time the terminals 91 and 94 do not have contact.

Mounting principle

Description

Add-on module for MCB type 4230-T. The working current module serves for remote trip of the MCB and for signalling whether the MCB was tripped electrically or manually.

Typical applications

Electrical remote trip of safety equipment with simultaneous monitoring of MCB status or its connected load.

Mounting

The add-on module is mounted on the left side of the MCB (seen from the front). For mounting, the MCB has to be in the OFF position. When auxiliary contact module/fault indicator module and a working current module are mounted at the same time, the working current module always has to be mounted first.

- Re-insert isolation pieces onto MCB
- Pull off left-side adhesive cover and carefully remove the perforated cover below

Caution: the MCB to UL489 must only be operated with the insulation pieces fitted.

Busbars UL 489 to be cut to length

Busbars for the connection of circuit breakers **type 4230-..U.. to UL 489** The busbars of 1m length can individually be cut to a suitable length for the application and isolated with end caps. Depending on the control cabinet design, the supply is by means of supply terminals without increasing the installation width or by means of a terminal block directly on the rail without increasing the installation height.

The models marked with "HS" are suitable for use with auxiliary contact modules with a width of 9 mm.

Busbar cross section:	18 mm ² .
Max. busbar current I_S (at 35°C):	
with supply at the end:	80 A
with supply in the middle:	160 A
Short circuit strength I_{cc} :	10 kA
Max. operating voltage:	480 V AC/DC
Degree of protection:	IP20
Step size:	17.8 mm

Number of poles	Number of modules	part no.
1-pole	57	X4230-BU157P18S
2-pole	56	X4230-BU256P18S
3-pole	57	X4230-BU357P18S
1-pole + HS	37	X4230-BU137P18H2S
2-pole + HS	46	X4230-BU246P18H1S
3-pole + HS	48	X4230-BU348P18H1S

HS = application with auxiliary switch 9 mm

Accessories for busbars UL489 that can be cut to length:

Supply terminal X4230-FTUC35

Cross-section	2.5-35 mm ² (2-14 AWG),
Tightening torque:	5.5 Nm (50 lbf.in)
Ampacity:	max. 115 A

Terminal block part no. X4230-FBU50

Cross-section	1.5-50 mm ² (1-14 AWG), solid/stranded 1.5-35 mm ² (2-14 AWG), finely stranded with wire end ferrule
Tightening torque:	supply: 3.5 Nm (35 lbf.in) output (track side): 2.5 Nm (22 lbf.in)
Ampacity:	max. 115 A

end caps part no. X4230-EC1

Accessories for all busbars UL489 that can be cut to length:

Protection against brush contact part no. X4230-TC2

for covering unused modules

Busbars UL 489, cannot be cut to length

Busbars for the connection of circuit breakers **type 4230-..U..** to **UL489**. Depending on busbar type suitable for up to 18 poles.

Busbar cross section:	16 mm ²
Max. busbar current I _B :	115 A
Short circuit strength I _{CC} :	10 kA
Max. operating voltage:	480 V AC/DC
Degree of protection:	IP20
Step size:	17.6 mm

Number of poles	Number of modules	part no.

Busbars for IEC applications, to be cut to length

Busbars for the connection of circuit breakers **type 4230...E.. to IEC 60947-2**. The busbars of 1m length can individually be cut to a suitable length for the application and isolated with end caps.

The models marked with "HS" are suitable for use with auxiliary contact modules with a width of 9 mm.

Busbar cross section: 16 mm²
 Max. busbar current I_s (at 35°C):
 with supply at the end: 80 A
 with supply in the middle: 130 A
 Short circuit strength I_{cc}: 10 kA
 Max. operating voltage: 690 V AC/DC
 Degree of protection: IP20
 Step size: 17.8 mm
