Product Description	<p>The FST is a compact, cap-ended, ready-access, fiber-optic splice closure for use in aerial, underground and directly buried installations. Its small size, port flexibility and value make the FST popular for splicing low fiber count distribution cables in FTTH, FTTC, trunk and campus networks, as well as CATV and CCTV installations. The 13-port base configuration offers 12 round ports and one oval port for loop-through applications. Cover is environmentally sealed to the base using a rolling O-ring. Cable entry/exit points in the base are environmentally sealed using Cablelok mechanical seals to maintain density and sealing.</p>
