The SSF28 type is a vertical internally mounted switch designed to give reliable switching at higher pressures, up to 40 bar. The switch is mounted in the top or bottom of the tank, so fitting requires access to the inside of the tank.

They are manufactured in 316L stainless steel and will work in liquids of SG 0.7 minimum.

The switch action may be reversed by removing the float, inverting and then refitting it to the stem.
