

SC-SLIMCON6

Isolating Signal Converter

The SC-SLIMCON6 Isolating Signal Converter can accept a range of inputs including 4-20mA and voltage signals. The unit produces a high level DC output of either voltage or current.

Full 3 port isolation is standard on the product range.

The SC-SLIMCON6 can be configured to accept a current or voltage input and provides a current or voltage output. The input and output of the unit can also be reconfigured using the built in switches together with the zero and span adjustment potentiometers.

The unit is powered from 24Vdc nominal.

Notes

Absolute maximum ratings indicate sustained limits beyond which damage to the device may occur.

Austrate maximum ratings indicate sustained minits beyond winth damage to the device may occur. Device is protected against reverse polarity connection. External 100mA fuse required. Accuracy figures based on 24Vdc supply, 4-20mA output with 250_M load and an ambient 20°C.
