

## | HS25 SERIES

### INCREMENTAL ENCODER

#### Introduction

The HS25 combines the rugged, heavy duty features usually associated with shafted encoders into a hollow-shaft style. Its design includes dual bearings and seals for up to IP65 environmental ratings, a rugged metal housing and a sealed cable gland. This low profile design, just 2" deep, is easily mounted on a through shaft. Securing the encoder to the shaft is simple with a collet-style single screw clamp. A tether arm and tether block are available options to maintain housing stability during operation.

#### Features

- Accommodates shafts up to ¾" in diameter.
- Two available tethering styles provides installation flexibility
- Reducer bushings provide both electrical and thermal isolation
- Shaft seal and sealed bearing are standard features to provide IP rating
- Selected configurations available in 1 to 3 days shipment ("Express Encoder" option)

### **Applications**

- Motor feedback variable frequency drives
- Paper converting and printing equipment registration, cut-tolength, cartonizing
- Robotics compact size saves space
- Elevators traction control

### Mechanical

Shaft Bore	0.750", 0.625", 0.500", 0.375. Diameters 0.625" and under are supplied with insulating sleeves.
Allowable Misalignment	0.005: T.I.R. on mating shaft 0.75" from shaft end
Bore Runout	0.001" T.I.R.
Starting Torque at 25°C	7 oz-in max. for Through shaft (SS) and 4 oz-in max. for Blind shaft (BS).
Bearings	High precision ball bearings, Material: Chrome steel
Shaft Material	6061-T6 aluminum alloy
Bearing Housing	Die cast aluminum with protective finish
Cover	Die cast aluminum with protective finish
Bearing Life	7.5 X 10 <sup>9</sup> revolutions
Maximum RPM	6,000 RPM (see Frequency Response, below)
Moment of Inertia	17 X 10 <sup>-4</sup> oz-in-sec <sup>2</sup>
Weight	9 oz typical

## Electrical

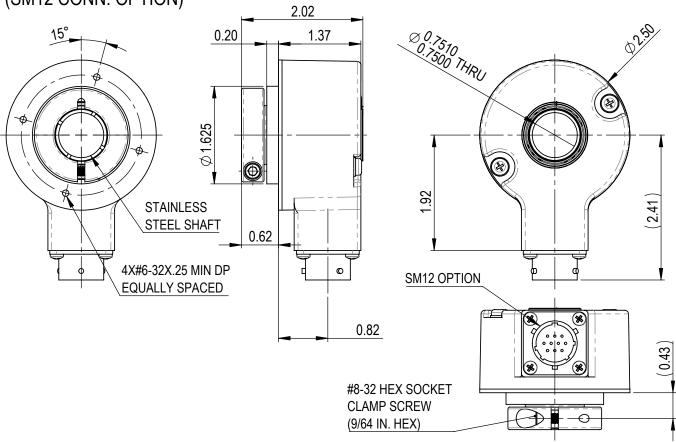

Code	Incremental			
Output Format	2 outputs in quadrature, A leads B CCW, 1/2 cycle index , Z, gated with negative B Consult factory for other output formats.			
Cycles per Shaft Turn	2 to 80,000 (see table 2)			
Supply Voltage	5 to 28 VDC +/- 5%			
Current Requirements	100 mA typical +output load, 250 mA (max)			
Voltage/Output	(See notes)  15/V: Line Driver, 5–15 VDC in, Vout = Vin  28/V: Line Driver, 5–28 VDC in, Vout = Vin  28/5: Line Driver, 5–28 VDC in, Vout = 5 VDC  28/O: Open Collector, 5–28 VDC in, OCout			
Protection Level	Reverse, overvoltage and line driver output protection diodes			
Frequency Response	300 kHz			
Output Terminations	See Table 1			

## Environmental

Enclosure Rating	IP65 Standard with M12 connector or Cable Gland output terminations. (Includes SCS18-M18 option)
Temperature	Standard operating temperature -40° C to +85° C; options available at -40° C to +100° C (Consult factory). Storage temperature -40° C to +100° C.
Shock	100 g's for 5 msec duration
Vibration	50 to 2000 Hz @ 30grms
Humidity	98% RH without condensation

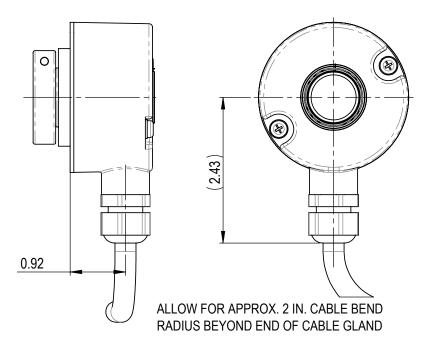

HS25F-75-SS: .75 IN. THRU BORE (SM12 CONN. OPTION)

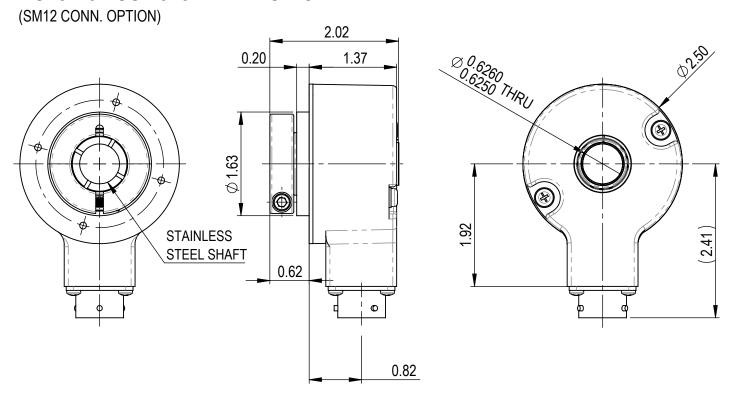

HS25F-75-SS: .75 IN. THRU BORE

(SCS CABLE OPTION)

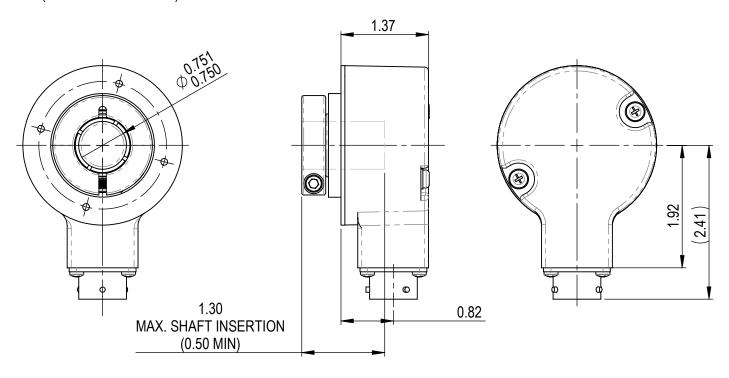

## HS25F-62-SS: .625 IN. THRU BORE

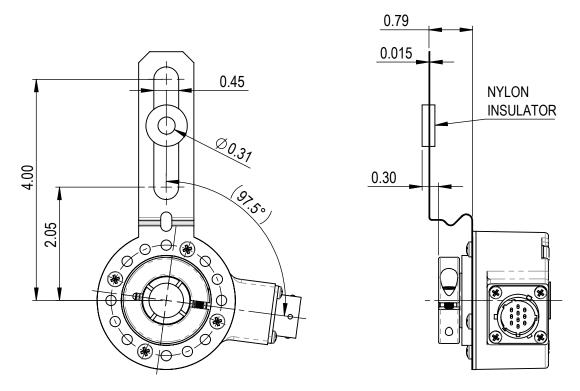

# HS25F-75-BS: .75 IN. BLIND BORE

(SCS CABLE OPTION)

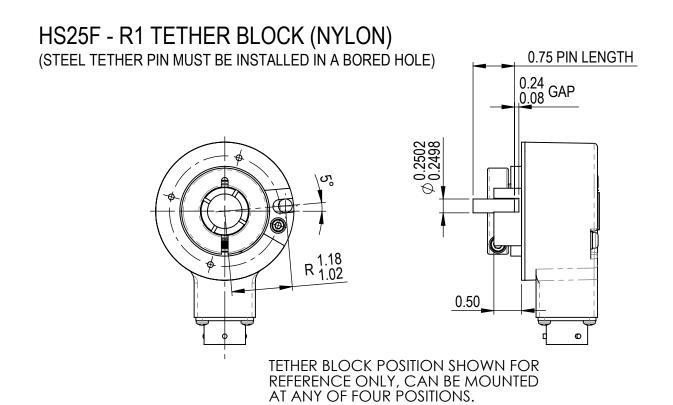

# HS25F - R2 TETHER ARM (STAINLESS STEEL)

(INCLUDES 5/16"-18 MOUNTING BOLTS NOT SHOWN)

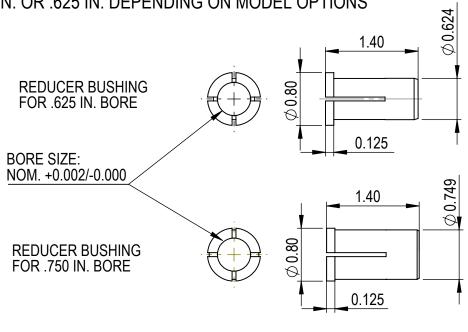

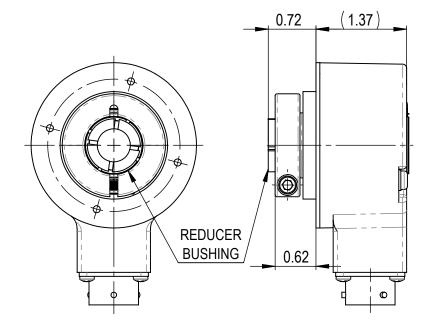

TETHER ARM POSITION SHOWN FOR REFERENCE ONLY, CAN BE MOUNTED AT ANY OTHER ANGLE IN 22.5° INCREMENTS.

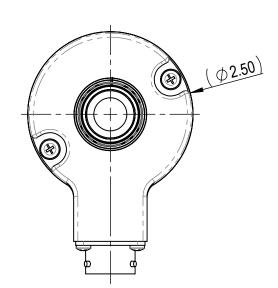

## **HS25F REDUCER BUSHING**

GLASS FILLED NYLON. FOR BORE SIZES LESS THAN .750 IN. OR .625 IN. DEPENDING ON MODEL OPTIONS

- 1. The shaft seal is recommended in virtually all installations. The most common exceptions are applications requiring a very low starting torque or those requiring operation at both high temperature and high speed.
- 2. Complementary outputs are recommended for use with line driver type (source/sink) outputs. When used with differential receivers, this combination provides a high degree of noise immunity.
- 3. Output IC's are available as either Line Driver (LD) or NPN Open Collector (OC) types.
- 4. Open Collectors require pull-up resistors, resulting in higher output source impedance (sink impedance is similar to that of line drivers). In general, use of a Line Driver style output is recommended.
- 5. Line Drivers source or sink current and their lower impedance mean better noise immunity and faster switching times. Warning: Do not connect any line driver outputs directly to circuit common/OV, which may damage the driver.
- 6. Outputs protection diodes on std. product, diodes will redirect current away from output node if shorted to +V or 0V, excessive voltage will damage diodes.
- 7. Reverse voltage protection: indefinite revers polarity at 30VDC.
- 8. Transient voltage protection: 10/100 us waveform. 600W peak pulse power on 10/100 us waveform.
- 9. Special -S at the end of the model number is used to define a variety of non-standard features such as special shaft lengths, voltage options, or special testing. Please consult the factory to discuss your special requirements.

Figure 1: Output Waveform

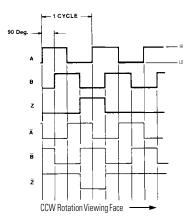

Table 1: Incremental Output Terminations

Wire Color	SCS18-M18	Connector	M12 Connector			
(22AWG)	Pin	Channel	Pin	Channel		
YEL	А	А	А	А		
BLU	В	В	В	В
