

# DMC1220 WIRING SYSTEM SERVICE KIT For The C-130H

## THE MAINTENANCE PROBLEM...

Modern aircraft, such as the C-130H, have complicated electrical wiring systems containing many different connectors, contacts and terminals, the repair of which require precision tools.

It is not a cost effective use of the time of your technical staff to start from scratch and try to become intimately knowledgeable about which precision tools must be used to repair each electrical connector, contact and terminal when DMC has already performed this task for the C-130H.

**AOG TIME CONSTRAINTS.** Once the aircraft becomes inoperable because of a connector failure, it is imperative to be able to replace the connector, contact or terminal as quickly as possible to avoid loss of mission capability due to AOG. The DMC1220 kit supplies your staff with both the information and the tools necessary to make this type of repair to the C-130H in the shortest time possible.

## THE DMC SOLUTION...

**TOOLING RESEARCH.** DMC has already researched the list of connectors for the C-130H and has identified the most common tools required to maintain the electrical connectors in the C-130H. DMC has cross referenced these tools to the connectors, contacts and terminals, eliminating costly and time-consuming research which would otherwise have to be performed by your electrical technicians.

**IMMEDIATE AVAILABILITY OF TOOLS AND TECHNICAL INFORMATION.** The DMC1220 kit contains all of the tooling to connector, contact and terminal cross reference information needed to support the C-130H. In addition, the DMC1220 kit also contains illustrated operating instructions for the required tooling.

**ALL IN ONE.** Since all of these tools, together with their operating instructions, are contained in a single kit, the connector repair can be made in the shortest time possible, thus permitting a rapid return of your C-130H to service.

Actual Kit may vary from example shown.

## DMC1220 TOOL & ACCESSORY LIST

	5	Crimp Tools
	7	Turret Heads
	12	Positioners
	1	Single Position Head
	11	Metal Insertion Tools
	20	Metal Removal Tools
	65	Plastic Ins/Rem Tools
	4	Contact gages
	2	Metal Removal Tools w/ Probes
	1	Wire Cutter
	4	Wire Strippers
	4	In-Service Inspection Gage
	1	Die Removal Tool
	21	Die Sets
	1	Hex Wrench
	4	Coaxial Cable Stripper

Tools contained in this kit have been selected based upon their suitability to service the related connector or contact indicated. Military Standard tools have been utilized wherever possible. These tools are not necessarily the production tools used to manufacture the aircraft and therefore, these tools may or may not correspond to the tools listed in the OEM wiring manual and/or the Chapter 20 Standard Wiring Practices Manual list of approved tooling.
