

Single-Stage, High PF, Low THD Constant-Voltage/Constant-Current AC/DC Controller for LED Lighting up to 90W

1 Description

The iW3671 is a single-stage high-performance AC/DC primary-side-regulation PWM controller with power factor correction (PFC). It is designed to support flyback and buck-boost topologies at output power levels up to 90W. The iW3671 supports different types of loading including constant power (CP) loads such as a second-stage DC/DC converter; and constant resistance (CR) loads such as LED light strips.

The iW3671 uses Dialog's **PrimAccurate™** technology to provide accurate constant voltage (CV) and constant current (CC) regulation across AC line and load conditions. The digital control eliminates the need for external loop compensation while maintaining stability across all operating conditions. With Dialog's patented **PF-Boost™** technology, the iW3671 can achieve power factor (PF) greater than 0.9 and total harmonic distortion (THD) less than 20% at 50% or greater loading and across the entire AC line voltage range.

The iW3671 can achieve less than 150mW standby power loss while keeping excellent load transient response in CV mode. In addition, there is no audible noise during load transient or during startup, which is a typical shortcoming of most PFC CV controllers. Startup time is less than 0.25s with active startup circuit and advanced startup control in the iW3671.

The iW3671 also features various protections such as output over-voltage, output short-circuit, AC over-voltage, AC under-voltage, current-sense-resistor short, over-current and over-temperature protections. This ensures great system reliability.

2 Features

- Universal AC input voltage range $90V_{AC} \sim 305V_{AC}$
- Supports up to 90W output power in tiny SOT-23 package
- CV mode AC line and load regulation $< \pm 3\%$
- CC mode AC line and load regulation $< \pm 5\%$
- $PF > 0.9$ and $THD < 20\%$ across AC line voltage for $> 50\%$ of full load
- Fast startup time $< 0.25s$
- Standby power $< 150mW$ at $230V_{AC}$ input up to 90W with external active startup DFET circuit
- No audible noise across AC line and load conditions, and during load transient or startup
- Wide operating supply voltage (V_{VCC}) range from 8.0V to 20V
- Comprehensive protection features
 - » Output over-voltage protection
 - » Output short-circuit protection
 - » AC over-voltage protection
 - » AC under-voltage protection (Brown-out)
 - » Cycle-by-cycle peak current limit
 - » Current-sense-resistor short protection
 - » Over-temperature protection

3 Applications

- Two-stage or single-stage LED lighting drivers
- AC-DC adapters, TVs, monitor power supplies that require power factor

4 Pinout Description

Figure 4.1 : 6-Lead SOT23 Package

Pin Number	Pin Name	Type	Pin Description
1	VCC	Power Input	IC power supply.
2	VFB	Analog Input	Output voltage and transformer reset sense.
3	VIN	Analog Input	Input AC line voltage sense.
4	CS/CFG	Analog Input	Power MOSFET current sense and configuration.
5	GND	Ground	Ground reference.
6	OUTPUT	Analog Output	Power MOSFET gate drive .

Single-Stage, High PF, Low THD Constant-Voltage/Constant-Current AC/DC Controller for LED Lighting up to 90W

5 Absolute Maximum Ratings

Absolute maximum ratings are the parameter values or ranges which can cause permanent damage if exceeded. For maximum safe operating conditions, refer to Electrical Characteristics in Section 6.

Parameter	Symbol	Value	Units
DC supply voltage range (pin 1, $I_{VCC} = 20\text{mA max}$)	V_{VCC}	-0.3 to 22.0	V
Continuous DC supply current at VCC pin ($V_{VCC} = 15\text{V}$)	I_{VCC}	20	mA
V_{VIN} (pin 3)		-0.3 to 20.0	V
OUTPUT (pin 6)		-0.3 to 20.0	V
V_{VFB} (pin 2, $I_{VFB} \leq 10\text{mA}$)		-0.7 to 5.0	V
CS/CFG input (pin 4)		-0.3 to 5.0	V
Maximum junction temperature	T_{JMAX}	150	°C
Operating junction temperature	T_{JOPT}	-40 to 150	°C
Storage temperature	T_{STG}	-65 to 150	°C
Thermal resistance junction-to-ambient	θ_{JA}	100	°C/W
ESD rating per JEDEC JS-001-2017		$\pm 2,000$	V
Latch-up test per JESD78E		± 100	mA

Single-Stage, High PF, Low THD Constant-Voltage/Constant-Current AC/DC Controller for LED Lighting up to 90W

6 Physical Dimensions

7 Ordering Information

Part Number	Description	Package	Description
iW3671-00	Optimized for 1-stage or 2-stage CV applications	SOT-23	Tape & Reel ¹

Note 1: Tape & Reel packing quantity is 3,000/reel. Minimum packing quantity is 3,000.

Single-Stage, High PF, Low THD Constant-Voltage/Constant-Current AC/DC Controller for LED Lighting up to 90W

Disclaimer

Unless otherwise agreed in writing, the Dialog Semiconductor products (and any associated software) referred to in this document are not designed, authorized or warranted to be suitable for use in life support, life-critical or safety-critical systems or equipment, nor in applications where failure or malfunction of a Dialog Semiconductor product (or associated software) can reasonably be expected to result in personal injury, death or severe property or environmental damage. Dialog Semiconductor and its suppliers accept no liability for inclusion and/or use of Dialog Semiconductor products (and any associated software) in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk.

Information in this document is believed to be accurate and reliable. RoHS Compliance

Dialog Semiconductor's suppliers certify that its products are in compliance with the requirements of Directive 2011/65/EU of the European Parliament on the restriction of the use of certain hazardous substances in electrical and electronic equipment. RoHS certificates from our suppliers are available on request.
