

iW1830-EVAL

Evaluation Board for 15W Dual-Output Switch-Mode Power Supply

1 Description

The iW1830-EVAL evaluation board implements a dual-output, 15W power supply based on Dialog Semiconductor's iW1830 **AccuSwitch™** digital off-line power supply controller IC. The evaluation board supplies two outputs, 12V/1A and 5V/0.5A, using a single primary-side controlled quasi-resonant flyback converter.

The design implements two output voltages using one primary-side controller and achieves the tight regulation required by high-reliability applications such as white goods, home appliances and industrial control.

The iW1830 controller integrates a 700V power MOSFET to lower the power supply BOM cost and uses Dialog's advanced **PrimAccurate™** digital control technology to eliminate the need for external secondary-side feedback components, further reducing component count and cost, while improving reliability. It operates in quasi-resonant mode to improve efficiency and help meet EMI standards. This quasi-resonant operation and Dialog's **EZ-EMI®** technology enable excellent EMI performance with minimal external filtering. Proprietary control technology allows high efficiency across a broad range of loads, which enables the iW1830 to meet stringent international standards for power supply efficiency.

2 Features

- Wide input voltage range: 90V_{AC} to 264V_{AC}
- Output voltages: 12V and 5V
- Output current: 12V - 1A, 5V - 500mA
- Total output power: 15W max.
- Integrated 700V MOSFET
- Active mode efficiency > 84%
- Supports high capacitance loads up to 6,000µF
- Low no-load power: < 100mW (at 230 V_{AC})
- **EZ-EMI®** technology: excellent EMI performance with a minimum of external EMI filtering components
- Quasi-resonant operation
- Low component count and small PCB footprint
- iW1830 IC protections:
 - » Output short-circuit, over-current, over-voltage
 - » Input voltage protection: brown-out, brown-in, unplug
 - » Over-temperature protection - internal sensor

3 Applications

- Power Supplies for:
 - » White Goods
 - » Home Appliances
 - » Industrial Control
 - » Network Devices

Evaluation Board for 15W Dual-Output Switch-Mode Power Supply

WARNING

Disclaimer for High Voltage (Mains Powered) Evaluation Boards

Warning

This evaluation board is powered by AC mains voltage. When powered, this evaluation board generates non-insulated high voltages which may produce electrical shock, burn, and/or fire hazards, resulting in risk of property damage, personal injury, and/or death.

When the evaluation board is powered, never touch the board or its electrical circuits since they may be operating at high voltages that can cause an electrical shock hazard.

TO BE USED FOR EVALUATION PURPOSES ONLY

This board is intended for evaluation purposes only and not intended for commercial use in an end product. Any other use is strictly prohibited by Dialog Semiconductor.

WORK AREA AND PERSONAL SAFETY

This board should be used in a test area/laboratory specifically designed and designated for working with, and evaluating high-voltage electrical devices. Only trained and qualified professional personnel with experience, knowledge and training in the use of high-voltage electrical circuits should use this evaluation board. Trained personnel must use required personal protective equipment and required laboratory equipment when working with the evaluation board.

The professional personnel operating this evaluation board and the test area/laboratory in which it is operated must be qualified according to the local regulations, guidelines and labor laws applicable to working with non-isolated mains voltages and high voltage circuits.

An isolated housing is highly recommended when using this evaluation board.

Use this evaluation board at your own risk.

NOT AGENCY APPROVED

This evaluation board has not been agency tested or approved for safety, technical performance, and/or regulatory requirements, such as electromagnetic interference or other technical regulatory or safety requirements.

Evaluation Board for 15W Dual-Output Switch-Mode Power Supply

4 Evaluation Board Specifications

The table below shows the electrical specifications of the evaluation board specified at $T_A = 25^\circ\text{C}$, unless otherwise noted.

Description	Symbol	Min	Typ	Max	Units	Comment
Input						
Voltage	V_{IN}	90		264	V_{AC}	2 wire
Frequency	f_{LINE}	47	50/60	63	Hz	
No-load input power (230V _{AC})				100	mW	
Output						
Output voltage	V_{OUT1}	4.75	5.00	5.25	V	Measured at the end of PCB
	V_{OUT2}	10.8	12	13.2	V	
Output current	I_{OUT1}	0		0.5	A	
	I_{OUT2}	0		1.0	A	
Output ripple voltage	$V_{RIPPLE (5V)}$			200	mV _{P-P}	Connected with 10 μ F E-cap and 100nF C-cap; $I_{OUT1} = 0.5A$, $I_{OUT2} = 1A@T_A = 25^\circ\text{C}$ 20MHz Bandwidth
	$V_{RIPPLE (12V)}$			200	mV _{P-P}	
Total Output Power						
Continuous output power	P_{OUT}		14.6		W	
Over power protection	OPP			17	W	Auto-restart
Active mode efficiency	η	84.5			%	Average of efficiency measured at 25%/50%/75%/100% $V_{IN} = 115V_{AC}$
Environmental						
Safety (Note 1)	Designed to Meet UL1310 (up to 120V _{AC}) Designed to Meet EN60335-1:2012					
Ambient temperature	T_{AMB}	0		40	$^\circ\text{C}$	Free convection, sea level

Note 1: The iW1830-EVAL has been designed to meet EN60335-1:2012 and UL1310 (up to 120V_{AC}), however individual boards have not been tested or verified to these standards.
