

Cree® LMD800 LED Module Driver

PRODUCT DESCRIPTION

Cree® LED modules provide lighting designers and manufacturers with simple, easy-to-adopt LED lighting solutions that reduce luminaire development time and speed time-to-market. The Cree® LMD800 LED module driver is specifically designed to work with the Cree LMH2 8000-lumen light source to jump-start the design process for recessed downlights, wall sconces or pendant lights in demanding end markets such as retail, museums, hospitality and restaurants.

FEATURES

- Input voltage: 120-277 V
- 0/1-10 V dimming support
- Optimized for Cree LMH2 8000-lm light sources
- Enables California Title 24 compliance

DIMMING

The LMH2 8000-lm light source can use the LMD800 LED module driver with 0/1-10 V dimming.

WIRING DIAGRAMS

Electrical Connection

LMH2 LED module operation is accomplished by connecting the AC mains to the two (2) lead wires (line and neutral) from the driver and connecting the driver output wires to the input leads on the Cree LMH2 light source, as indicated in the following wiring diagram.

The LED module driver lead wires are 150 mm long, 18 AWG with the ends stripped 10 mm.

Wiring Strain Relief

LMD800 LED module drivers must not be suspended directly by the leads. Though the wiring from the LMD800 LED module driver is internally strain relieved, additional strain relief methods must be employed if the luminaire is to be suspended solely by the wiring, as in a pendant luminaire.

THERMAL DESIGN

Expected LMD800 Lifetime versus Temperature at Tc Point

EMERGENCY BATTERY OPERATION

The LMD800 LED module driver is a constant-current supply. Interrupting the driver current with a battery supply is an acceptable method of emergency or power outage operation. An acceptable installation should also include a switching mechanism that prevents the battery power from entering the driver through the DC output leads. Confirming backup power supply compatibility is the responsibility of the luminaire manufacturer or installer. Please refer to the backup power supply manufacturer’s instructions for installation and further product information.

SAFETY AND REGULATORY NOTES

The following table shows the safety and regulatory certifications for the LMD800 LED module driver.

	LMD800 120- to 277-VAC Driver	
	Standard	File Number
Safety	UL/cUL recognized (UL8750)	E520046
	LVLE for US and Canada

Safety Certification

Together, the LMH2 light source combined with the LMD800 LED module driver is “suitable for damp locations; covered ceilings.” Final luminaire designs should go through safety certification as required, which is the responsibility of the luminaire manufacturer.

PACKAGING

LMD800 120- to 277-V LED module drivers are packaged in boxes of 5, which are then combined in cartons of 5 boxes, or 25 LMD800 120- to 277-V drivers.

Box and carton sizes are as follows.

Box of 5 LMD800 120- to 277-V LED module drivers: 490 x 235 x 90 mm

Carton of 5 LMD800 120- to 270-V driver boxes: 510 x 510 x 255 mm
