

TECHNOLOGY IN CONNECTORS™

SENSOR ACTOR LINE

GERMANY

As a leading connector manufacturer CONEC develops, produces and markets connectors worldwide to the electronic and communications industry. CONEC is committed to contribute to progress in inter-connect technology, and to satisfy and delight customers through innovation, quality manufacturing and superior services.

CONEC provides global account management in a customer's home country and combines the information received for product and design and delivery of the end product to the customer's multiple manufacturing locations worldwide.

Local sales and engineering support around the globe provides the customer knowledgeable assistance in their own language to fully communicate and to understand the needs of their business environment.

CANADA

USA

CONEC designs and manufactures a wide variety of electronic connector products.

CONEC provides reliable and effective solutions to problems faced by electronic equipment manufacturers, contract manufacturers and cable assembly operations.

AT CONEC, CUSTOMER SATISFACTION IS PRIORITY NUMBER ONE.

CONEC prides itself with its total quality management system. The customer's requirements and specifications are fully adhered to, from the design phase, through to the final approved series product. Close coordination on all levels is carried out with the customer. From the initial design concept to the end product our engineering group works closely with the customer at all times.

CONEC project management system allows for timely conclusion. CONEC is certified under **ISO/TS16949:2002**.

CONEC prides itself with having one of the most technical advanced in house test laboratories, allowing for accurate testing and measurement of its products. At CONEC we believe that customer service combined with quality products at an affordable price provides customer satisfaction. CONEC connectors are examined and certified according to the product family UL-CSA-VDE.

YOUR SOURCE FOR CUSTOMER SPECIFIC APPLICATION, DEVELOPMENT AND PRODUCTION.

CONEC is fast to respond to the customer's needs, with "just in time" programs, logistic requirements, local inventories, central order entry and processing, broad distribution and total quality management. CONEC has earned certified supplier status with many of its large customers worldwide.

**Are you searching for an application specific solution?
Standard products are not suitable?
Time to market is priority?**

CONEC with its team of engineering and know how to help you find the answer, e.g.:

- Special connectors according to customer specification
- Prototypes
- Fiber connectors for industrial applications

Contact us today for fast and efficient response.

SECTION 1

CONNECTORS M12X1 WITH OVERMOULDED CABLE _____

M12 x 1 circular connectors of the Sensor Actor Line from CONEC are used to connect a distributor box and a sensor.

They provide innovative connection technology fulfilling the requirements of protection class IP 67. It comes in a standard program with moulded versions – naturally with anti-vibration locking and they come in various cable lengths and quality.

Components with 2 or 3 LEDs indicate operating voltage and/or the switching status.

When it gets really tough: Shielded connectors from CONEC protect and bypass weak signals. A uniform cable shielding ensures seamless signal transmission.

Connection cables with a combination of connectors and/or adapters can be used for nearly any cabling application.

SECTION 2

CONNECTORS FIELD-ATTACHABLE

Field attachable connectors from CONEC give you the freedom and flexibility to react to the cabling situation on site. Practical, cost-effective and, above all, flexible solutions for quick cabling are required for both small series as well as special purpose machines. This program comprises connectors and adapters – naturally with anti-vibration locking – in a straight or angled construction as well as in shielded versions. You can choose between screw and clamp connections as well as a maximum cable diameter of 6 or 8 mm.

SAL M12X1 CONNECTORS FIELD-ATTACHABLE

SECTION 3

SOCKETS M12X1

Connectors and adapters are available in different pin configurations with 0.5 mm long single wires as well as pin contacts for the M12x1 connection to the device.

Front mounted flange connectors with wires are also available. They also can be positioned with a lock nut. Flange connectors and adapters for rear housing assembly with different length pin contacts for soldering directly on the printed circuit board complete the program.

An installation flange for direct assembly on the printed circuit board is also available with a shielded connection option in an axial and angled version. A spring-loaded shield plate connects the flange housing directly to the printed circuit board, which is especially important in bus applications. All products in this series are designed for a printed circuit board thickness of 1.6 mm and a device wall thickness of 2-3 mm. You can select from two different installation heights (10.0 mm and 5.5 mm) for the axial version.

SECTION 4

JUNCTION SYSTEMS

Y junction boxes from CONEC enable you to lay two incoming signals together at one E/A socket.

For example, this means that you can double your connection options for one actuator / sensor box.

You can connect up to 16 initiators using one M12x1 junction box with 8 E/A sockets. CONEC overmoulded components are also available for the output connection to the sensor.

This provides a cost-effective and practical wiring system in the field for sensors and actors with a cabling system that meets protection class IP 67. Junction boxes are used anywhere sensor and actor signals need to be extended quickly and easily for connection to their superordinate control systems. Individual signals are either connected directly to the superordinate system via a homerun cable or via a connection interface. Optional LED displays for signal and power reduce the effort required to track down errors.

SECTION 5

SPECIALE APPLICATIONS M12X1

The demands for higher and higher degrees of temperature resistance certainly don't stop for industrial automation.

For these kinds of applications, CONEC now offers the high temperature family, which can withstand 8000 hours at a constant temperature of +125°C – it can also withstand temporary peak values of up to 150°C over 2000 hours.

The Food & Beverage industry has very special requirements regarding chemical and temperature resistance – also for the circular connector.

The procurement of standard components is often not up to this task. Materials have been selected for the CONEC circular connectors of the FOOD&BEVERAGE family which meet high hygienic requirements and which are resistance to common, harsh cleaning agents used in high pressure cleaning processes.

FOOD&BEVERAGE circular connectors from CONEC meet protection class IP69K.

SECTION 6

BUS SYSTEMS M12X1

Bus technology has advanced over the last few years in industrial automation. The connectors required for data transmission are very bus-specific in their design. To access the very complex world of bus technology, CONEC offers connectors for Profibus DP and Industrial Ethernet.

Profibus is a manufacture-dependent, open field bus system for a variety of applications in manufacturing, processing and building automation.

Industrial Ethernet is the general term for all applications that use the Ethernet standard to network devices used in industrial automation. In industrial applications, networks must operate without interruption under extreme conditions, e.g. electromagnetic interference, very high constant temperatures as well as high mechanical specifications. Industrial Ethernet closes the circle, as it were, and creates a complete infrastructure, which stretches from the office to the machinery or even to the sensor.

For both bus systems, CONEC offers special M12x1 connectors with corresponding coding which meets the guidelines of the PNO (Profibus User Organization) and the IEC 61076-2-101 Ad. 1.

The coding used for these products (B and D coding) prevent in-correct connections using standard M12x1 components.

SAL CONNECTORS SUB-D

SUB-D Male connector, 9-pos, angled, with programming interface and quick connection for flexible conductor

TECHNICAL DATA	
Housing SUB-D	Thermoplastic chrome-plated
Rated voltage	4,75 - 5,25 V DC
Current rating	12,5 mA
Degree of protection	IP40
Temperature range	-25 °C to +60 °C
Mating cycles	<=100
SUB-D	with switchable ferrule resistor

Directive 2002 95 EC
"RoHS"
Compliant

SECTION 7

M8x1/Ø8MM CONNECTORS

The small yet robust M8 x 1/Ø8 mm circular connector is ideal for compact and space-sensitive industrial applications. This small brother to the M12x1 circular connector has an installation-friendly and compact design. A handy lock nut/screw with integrated anti-vibration locking ensures a reliable connection.

You can choose from adapters with a screw and snap design, connectors with a screw and screw/snap design (each available in an axial/angled version).

SECTION 8

CONNECTORS 7/8"

Round connector-systems with a 7/8"-16 UN thread according to ANSI/B93.55M are proper for applications with increasing power requirement up to 16A as well as higher working voltages e.g. the feed-in of field-devices in the area of automation technics. Insertion in a tough and harsh environment is possible.

The current versions are equipped screwable and got a screwing concept with self-locking (anti-vibration locking).

The 7/8"-family contains versions with overmoulded cable as well as field-attachable components.

SECTION 9

RUND24 CONNECTORS

Rund24 connectors are part of a universal connector system with a plastic locking device for the transmission of higher currents and voltages. The use of high quality thermoplastic with special properties such as stiffness, impact resistance and high flammability resistance as well as a screw concept with a self-locking feature (anti-vibration locking) enables this product to be used in rough and robust environments.

This connector family has both an overmoulded version as well as a field attachable version.

SECTION 10
VALVEPLUGS

Valve connectors are a compact and very robust connection solution for the secure transmission of voltages and current for pneumatic, hydraulic and electromagnetic actuators.

Five different designs – A, B, B-Industry, C contact distance 8mm and C contact distance 9.4mm – are available that meet EN 175301-803 specifications. You can choose from versions with an integrated protective circuit to reduce voltage spikes and/or an LED function display for quick error diagnosis. Versions are also available without the integrated protective circuit.

DEGREE OF PROTECTION

Connectors have to be protected for safety reasons from outside influences like dust, foreign objects, direct contact, moisture and water. This protection is provided on industrial connectors by its housings with their latching devices and sealed cable entries. The degree of protection can be selected depending on the type of intended use. The degree of protection is indicated by a material code which consists of constant key numbers IP (International Protection) and two subsequent code numbers. The first code number specifies the degree of protection against contact and foreign bodies. The second code number specifies the degree of protection against damaging intrusion of water.

KENNZIFFERN-DEFINITION

Code number 1	Definition	Explanation
0	Non-protected	
1	Protected against access to hazardous parts with the back of a hand. Protected against solid foreign objects of Ø ≥ 50mm	
2	Protected against access to hazardous parts with a finger. Protected against solid foreign objects of Ø ≥ 12,5mm	
3	Protected against access to hazardous parts with a tool. Protected against solid foreign objects of Ø ≥ 2,5mm	
4	Protected against access to hazardous parts with a wire. Protected against solid foreign objects of Ø ≥ 1mm	
5	Protected against access to hazardous parts with a wire. Dust protected.	Intrusion of dust is not totally prevented, but dust shall not penetrate in a quantity to interfere with satisfactory operation of the device or to impair safety.
6	Protected against access to hazardous parts with a wire. Dust-tight.	

Code number 2	Definition	Explanation
0	Non-protected	
1	Protected against water drops.	
2	Protected against water drops when enclosure tilted up to 15°.	
3	Protected against spraying water	Water sprayed of an angle up to 60° on either side of the vertical shall have no harmful effects.
4	Protected against splashing water	Water splashed against the disclosure from any direction shall have no harmful effects.
5	Protected against water jets	
6	Protected against powerful water jets	
7	Protected against the effects of temporary immersion in water	Intrusion of water in quantities causing harmful effects shall not be possible when the enclosure is temporarily immersed in water for 30 min. in 1m depth.
8	Protected against the effects of temporary immersion in water	Intrusion of water in quantities causing harmful effects shall not be possible when the enclosure is continuously immersed in water under conditions which shall be agreed between manufacturer and user but which are more severe than for numeral 7.
9	Protected against water during high pressure/steam cleaning	

AMERICAN WIRE GAUGES

Since various areas of the industry are also using wires according to the American Wire Gauge (AWG). The following comparison chart is included to allow a cross reference between AWG and metric wire sizes (mm²).

INDEX NUMBER-DEFINITION

AWG	Wire structure (mm)	Wire-Ø (mm)	Wire cross section (mm ²)
30	1 x 0,25	0,25	0,05
	7 x 0,10	0,36	0,06
28	1 x 0,32	0,32	0,08
	7 x 0,13	0,38	0,09
26	1 x 0,40	0,40	0,13
	7 x 0,16	0,48	0,14
	19 x 0,10	0,51	0,15
24	1 x 0,51	0,51	0,21
	7 x 0,20	0,61	0,22
	19 x 0,13	0,64	0,25
22	1 x 0,64	0,64	0,33
	7 x 0,25	0,76	0,34
	19 x 0,16	0,81	0,38
20	1 x 0,81	0,81	0,52
	7 x 0,32	0,97	0,56
	19 x 0,25	1,27	0,93
18	1 x 1,02	1,02	0,82
	19 x 0,25	1,27	0,93
16	19 x 0,29	1,44	1,25
14	19 x 0,36	1,80	1,93
12	19 x 0,46	2,29	3,16
10	37 x 0,40	3,10	4,65

PG-THREAD – METRICAL THREAD

The interim period fro DIN 46320 „screwing for cables and conducting lines with PG-thread“ expired on 31.12.1999. Since then, screwing for cables and conducting lines had to comply with the national standard 46319 before this was replaced by EN50262 on 01.03.2001.

LINE-UP

PG-tread	metrical thread	Width across flat for screwed cable	max. width across flat/mm	max. edge size/mm
PG7	M12x1,5/M10x1,5	M12x1	16	18
PG9	M16x1,5	M16x1,5	21	23
PG11	M16x1,5	M23x1,5	25	28
PG13,5	M20x1,5			

VOLTAGE GRADING OF CONNECTORS: DEGREE OF POLLUTION

The degree of pollution applies to the interface of the connection, that is to say the area, where female and male connector are connected. There are four grades in which connectors are classified. This depends to the pollution which can be expected.

In the area of circular connectors its Grade 3 in the majority of cases.

POLLUTION DEGREE-DEFINITION

Pollution degree	Definition
1	No pollution or only dry, non-conductive pollution occurs. The pollution has no influence.
2	Only non-conductive pollution occurs. Except that occasionally a temporary conductivity caused by condensation is to be expected.
3	Conductive pollution occurs or dry non-conductive pollution occurs which becomes conductive due to condensation which is to be expected.
4	The pollution generates persistent conductivity caused by conductive dust or by rain or snow.

CODING OF M12X1-CONNECTORS

The coding of M12x1 circular connectors with a pin or a slot on the contact insert prevents identical connectors from being plugged into the wrong place.

A difference is drawn between the standard coding A, the B-coding (reverse key) for bus applications such as Profibus and the D-coding for Ethernet applications.

CONEC Product Line

EMI Interface Solutions

Filter D-Subminiature Connectors, Filter Combination Connectors, Filter Water Resistant Connectors, Filter Plates, RJ 45 Magnetic Modular Jack

I/O Connectors

Standard D-Subminiature Connectors, Combination D-Subminiature Connectors, Water Resistant Connector System, D-Subminiature Hoods, D-Subminiature Accessories, SCSI Connectors

PCB Interconnect System

DIN EN 60603-2 Connectors, Combination DIN EN 60603-2 Connectors, DIN 41617 Connectors, Press Fit DIN and D-Subminiature Connectors, DIN 41651 Flat Cable System, Measuring Connector System

PCB Fiber Optic

Fiber Optic Connectors, Fiber Optic Adapters, Fiber Optic Hybrid Adapters, Fiber Optic Outdoor System, Fiber Optic Cable Assembly, Fiber Optic Tools

Coaxial Connectors and Contacts

SMA Coaxial Connectors, SSMA Coaxial Connectors, BNC Coaxial Connectors, D-Sub Coaxial Contacts, DIN Coaxial Contacts, D-Sub High Power and High Voltage Contacts, DIN High Power Contacts

AdvancedTCA / Compact PCI

ATCA Connectors, CPCI Connectors, Tools
