Precautionary Notes

- 1. Refer to application note AND8003/D, "Storage and Handling of Dry Packed Surface Mounted Devices" for details of handling procedure.
- Product soldering terminals are silver plated and oxidization may occur with prolonged exposure to ambient environment. Oxidized terminal
 may have poor solderability performance. Keep unsealed devices in moisture barrier bag sealed with desiccant or in dry cabinet at <5%
 relative humidity.
- Store PCB in sealed moisture barrier bag together with desiccant or store in dry cabinet at <5% relative humidity. Mounted device that has been exposed to ambient environment for long period of time may suffer moisture related damage if PCB is subjected to subsequent high temperature processes.
