

Legal Notices for Recycling

Battery Regulation (BattV)

Disposal of used batteries in the household waste is prohibited. The user is obliged to return used batteries free of charge to a retailer or from the public waste carriers for recycling facility set up. Contaminated batteries and batteries are marked with the symbol of the crossed out wheelie bin. Below the icons, there is the designation of the heavy metal contained:

CD: contains more than 0.002 per cent of cadmium

Hg: contains more than 0.0005 percent mercury

Pb: contains more than 0.004 percent lead.

Unless you have received rechargeable batteries from us, you are able to return them to us after use of course.

This is also true even if batteries are not sold separately, but already installed in appliances (f.e. laptops or cell phones).
