

ARTESYN MODULAR HIGH POWER SYSTEM

Up to 30,000 W

iHP12/15

iHP24/30

Advanced Energy's iHP configurable precision power system provides accuracy, resolution and stability as either a programmable voltage or current source. It can be configured for up to 8 outputs using a wide variety of plug-in modules that address a large range of voltages and currents. When operating at 480 VAC 3-phase nominal, and using the 12 kW modules, extra slots left available can be populated with the 3 kW single slot modules to provide up to 30 kW in the 8-slot racks and 15 kW in the 4-slot racks for up to 4 outputs.

Safety approvals secured by Advanced Energy eliminate the need for an isolation transformer in medical equipment. The iHP power system also has industrial safety approvals, including compliance to the SEMI F47 standard for semiconductor processing equipment.

The iHP offers developers either an analog or digital interface to their system supporting standard communications protocols, while a software GUI allows for easy configuration and user dashboard creation. For horticulture customers, detailed scheduling and control software is available. For non-medical applications, a smaller and lighter rack is now available using the same plug-in modules.

ORDERING INFORMATION (CONTINUED)**MODEL NUMBER SHORTCUT**

For repeated like modules in parallel or series, instead of listing all the same modules separated by a “-”, you can simply list the module once and then follow by the number of times it repeats enclosed in parenthesis.

For example:

iHP24H3A-SW-SW-SW-SW-SW-SW-S8-S8-00

would become:

iHP24H3A-SW(6)-S8(2)-00

A model number example for iHP30:

iHP30H3A-TW-T3-SW-S8-00
