

# SPEC

|          |                       |
|----------|-----------------------|
| Spec No. | TQ3C-8EAF0-E1YAD48-01 |
| Date     | October 3, 2017       |

## **TYPE : TCG035QVLPDANN-GN50-S**

< 3.5 inch QVGA transmissive color TFT  
with LED backlight>

### CONTENTS

1. Application
2. Construction and outline
3. Mechanical specifications
4. Absolute maximum ratings
5. Electrical characteristics
6. Optical characteristics
7. Interface signals
8. Input timing characteristics
9. Backlight characteristics
10. Lot number identification
11. Warranty
12. Precautions for use
13. Reliability test data
14. Outline drawing

KYOCERA DISPLAY CORPORATION

This specification is subject to change without notice.  
Consult Kyocera before ordering.

## **Warning**

1. This Kyocera LCD module has been specifically designed for use only in electronic devices and industrial machines in the area of audio control, office automation, industrial control, home appliances, etc. The module should not be used in applications where the highest level of safety and reliability are required and module failure or malfunction of such module results in physical harm or loss of life, as well as enormous damage or loss. Such fields of applications include, without limitation, medical, aerospace, communications infrastructure, atomic energy control. Kyocera expressly disclaims any and all liability resulting in any way to the use of the module in such applications.
2. Customer agrees to indemnify, defend and hold Kyocera harmless from and against any and all actions, claims, damages, liabilities, awards, costs, and expenses, including legal expenses, resulting from or arising out of Customer's use, or sale for use, or Kyocera modules in applications.

## **Caution**

1. Kyocera shall have the right, which Customer hereby acknowledges, to immediately scrap or destroy tooling for Kyocera modules for which no Purchase Orders have been received from the Customer in a two-year period.

## 1. Application

This document defines the specification of TCG035QVLPDANN-GN50-S. (RoHS Compliant)

## 2. Construction and outline

|                    |                                                                                                        |
|--------------------|--------------------------------------------------------------------------------------------------------|
| LCD                | : Transmissive color dot matrix type TFT                                                               |
| Backlight system   | : LED                                                                                                  |
| Polarizer          | : Glare treatment                                                                                      |
| Additional circuit | : Timing controller, Power supply (3.3V input)<br>(without constant current circuit for LED Backlight) |

## 3. Mechanical specifications

| Item                  | Specification                                   | Unit |
|-----------------------|-------------------------------------------------|------|
| Outline dimensions 1) | 76.9(W)×63.9(H)×4.9(D)                          | mm   |
| Active area           | 70.56(W)×52.92(H)<br>(8.8cm/3.5 inch(Diagonal)) | mm   |
| Dot format            | 320×(R,G,B)(W)×240(H)                           | dot  |
| Dot pitch             | 0.0735(W)×0.2205(H)                             | mm   |
| Base color 2)         | Normally White                                  | -    |
| Mass                  | 45                                              | g    |

1) Projection not included. Please refer to outline for details.

2) Due to the characteristics of the LCD material, the color varies with environmental temperature.

## 4. Absolute maximum ratings

### 4-1. Electrical absolute maximum ratings

| Item                      | Symbol          | Min. | Max. | Unit |
|---------------------------|-----------------|------|------|------|
| Supply voltage            | V <sub>DD</sub> | -0.3 | 4.0  | V    |
| Input signal voltage 1)   | V <sub>IN</sub> | -0.3 | 4.0  | V    |
| LED forward current 2) 3) | I <sub>F</sub>  | -    | 30   | mA   |

- 1) Input signal : CK, R0~R7, G0~G7, B0~B7, H<sub>SYNC</sub>, V<sub>SYNC</sub>, ENAB, REST, CSB, SCK, SDI  
 2) For each "AN-CA"  
 3) Do not apply reversed voltage.

### 4-2. Environmental absolute maximum ratings

| Item                     | Symbol           | Min. | Max. | Unit |
|--------------------------|------------------|------|------|------|
| Operating temperature 1) | T <sub>OP</sub>  | -20  | 70   | °C   |
| Storage temperature 2)   | T <sub>STO</sub> | -30  | 80   | °C   |
| Operating humidity 3)    | H <sub>OP</sub>  | 10   | 4)   | %RH  |
| Storage humidity 3)      | H <sub>STO</sub> | 10   | 4)   | %RH  |
| Vibration                | -                | 5)   | 5)   | -    |
| Shock                    | -                | 6)   | 6)   | -    |

- 1) Operating temperature is to warrant only temperature for operating and it specify highest heating portion temperature including self-heating.  
 Since display performance is evaluated at 25°C, another temperature range should be confirmed.
- 2) Temp. = -30°C < 48h , Temp. = 80°C < 168h  
 Store LCD at normal temperature/humidity. Keep them free from vibration and shock.  
 An LCD that is kept at a low or a high temperature for a long time can be defective due to other conditions, even if the low or high temperature satisfies the standard.  
 (Please refer to "Precautions for Use" for details.)
- 3) Non-condensing
- 4) Temp. ≤ 40°C, 85%RH Max.  
 Temp. > 40°C, Absolute humidity shall be less than 85%RH at 40°C.

5)

|                 |             |                                                 |
|-----------------|-------------|-------------------------------------------------|
| Frequency       | 10~55 Hz    | Acceleration value<br>(0.3~9 m/s <sup>2</sup> ) |
| Vibration width | 0.15mm      |                                                 |
| Interval        | 10-55-10 Hz | 1 minutes                                       |

2 hours in each direction X, Y, Z (6 hours total)

EIAJ ED-2531

- 6) Acceleration: 490 m/s<sup>2</sup>, Pulse width: 11 ms  
 3 times in each direction: ±X, ±Y, ±Z  
 EIAJ ED-2531

## 5. Electrical characteristics

Temp. = -20~70°C

| Item                            | Symbol   | Condition     | Min.        | Typ. | Max.        | Unit  |
|---------------------------------|----------|---------------|-------------|------|-------------|-------|
| Supply voltage 1)               | $V_{DD}$ | -             | 3.0         | 3.3  | 3.6         | V     |
| Current consumption             | $I_{DD}$ | 2)            | -           | 8.0  | 11.3        | mA    |
| Permissive input ripple voltage | $V_{RP}$ | $V_{DD}=3.3V$ | -           | -    | 100         | mVp-p |
| Input signal voltage 3)         | $V_{IL}$ | "Low" level   | 0           | -    | $0.2V_{DD}$ | V     |
|                                 | $V_{IH}$ | "High" level  | $0.8V_{DD}$ | -    | $V_{DD}$    | V     |

### 1) $V_{DD}$ -turn-on conditions

### 2) $I_{DD}$ measuring conditions

Typ. :  $V_{DD}=3.3V$ , Temp. = 25°C

Max. :  $V_{DD}=3.6V$ , Temp. = 70°C

Display pattern

### 3) Input signal : CK, R0~R7, G0~G7, B0~B7, H<sub>SYNC</sub>, V<sub>SYNC</sub>, ENAB, REST, CSB, SCK, SDI

## 6. Optical characteristics

Measuring spot =  $\phi$  6.0mm, Temp. = 25°C

| Item                                                                      |       | Symbol           | Condition                 | Min.  | Typ.  | Max.  | Unit              |
|---------------------------------------------------------------------------|-------|------------------|---------------------------|-------|-------|-------|-------------------|
| Response time                                                             | Rise  | $\tau_r$         | $\theta = \phi = 0^\circ$ | -     | 8     | -     | ms                |
|                                                                           | Down  | $\tau_d$         | $\theta = \phi = 0^\circ$ | -     | 22    | -     | ms                |
| Viewing angle range<br>View direction<br>: 12 o'clock<br>(Gray inversion) |       | $\theta_{UPPER}$ | $CR \geq 10$              | -     | 80    | -     | deg.              |
|                                                                           |       | $\theta_{LOWER}$ |                           | -     | 60    | -     |                   |
|                                                                           |       | $\phi_{LEFT}$    |                           | -     | 80    | -     | deg.              |
|                                                                           |       | $\phi_{RIGHT}$   |                           | -     | 80    | -     |                   |
| Contrast ratio                                                            |       | CR               | $\theta = \phi = 0^\circ$ | 700   | 1,000 | -     | -                 |
| Brightness                                                                |       | L                | IF=15mA/Line              | 700   | 1,000 | -     | cd/m <sup>2</sup> |
| Chromaticity coordinates                                                  | Red   | x                | $\theta = \phi = 0^\circ$ | 0.550 | 0.600 | 0.650 | -                 |
|                                                                           |       | y                |                           | 0.300 | 0.350 | 0.400 |                   |
|                                                                           | Green | x                | $\theta = \phi = 0^\circ$ | 0.295 | 0.345 | 0.395 |                   |
|                                                                           |       | y                |                           | 0.530 | 0.580 | 0.630 |                   |
|                                                                           | Blue  | x                | $\theta = \phi = 0^\circ$ | 0.110 | 0.160 | 0.210 |                   |
|                                                                           |       | y                |                           | 0.065 | 0.115 | 0.165 |                   |
|                                                                           | White | x                | $\theta = \phi = 0^\circ$ | 0.255 | 0.305 | 0.355 |                   |
|                                                                           |       | y                |                           | 0.280 | 0.330 | 0.380 |                   |

### 6-1. Definition of contrast ratio

$$CR(\text{Contrast ratio}) = \frac{\text{Brightness with all pixels "White"}}{\text{Brightness with all pixels "Black"}}$$

### 6-2. Definition of response time

### 6-3. Definition of viewing angle

### 6-4. Brightness measuring points

- 1) Rating is defined as the white brightness at center of display screen(3).
- 2) 5 minutes after LED is turned on. (Ambient Temp.=25°C)

## 7. Interface signals

| No. | Symbol            | Description                             | Note |
|-----|-------------------|-----------------------------------------|------|
| 1   | GND               | GND                                     |      |
| 2   | GND               | GND                                     |      |
| 3   | V <sub>DD</sub>   | 3.3V power supply                       |      |
| 4   | V <sub>DD</sub>   | 3.3V power supply                       |      |
| 5   | R0                | RED data signal(LSB)                    |      |
| 6   | R1                | RED data signal                         |      |
| 7   | R2                | RED data signal                         |      |
| 8   | R3                | RED data signal                         |      |
| 9   | R4                | RED data signal                         |      |
| 10  | R5                | RED data signal                         |      |
| 11  | R6                | RED data signal                         |      |
| 12  | R7                | RED data signal(MSB)                    |      |
| 13  | G0                | GREEN data signal(LSB)                  |      |
| 14  | G1                | GREEN data signal                       |      |
| 15  | G2                | GREEN data signal                       |      |
| 16  | G3                | GREEN data signal                       |      |
| 17  | G4                | GREEN data signal                       |      |
| 18  | G5                | GREEN data signal                       |      |
| 19  | G6                | GREEN data signal                       |      |
| 20  | G7                | GREEN data signal(MSB)                  |      |
| 21  | B0                | BLUE data signal(LSB)                   |      |
| 22  | B1                | BLUE data signal                        |      |
| 23  | B2                | BLUE data signal                        |      |
| 24  | B3                | BLUE data signal                        |      |
| 25  | B4                | BLUE data signal                        |      |
| 26  | B5                | BLUE data signal                        |      |

- 1) If the display is used under the condition which is out of specifications such as higher clock frequency than specified value, there is a possibility phenomenon such as display error including white display, malfunction and no image may occur.  
Please use the display under the conditions written in the specification.
- 2) In case of lower frequency, the deterioration of the display quality, flicker etc., may occur.

#### 1) Reverse scan control

### 8-4. Input Data Signals and Display position on the screen

## 9. Backlight characteristics

| Item                       | Symbol | Min. | Typ.   | Max. | Unit | Note              |
|----------------------------|--------|------|--------|------|------|-------------------|
| Forward current 1)         | IF     | -    | 15     | -    | mA   | Ta=-20~70°C       |
| Forward voltage 1)         | VF     | -    | 23.1   | 24.6 | V    | IF=15mA, Ta=-20°C |
|                            |        | -    | 22.1   | 23.6 | V    | IF=15mA, Ta=25°C  |
|                            |        | -    | 21.7   | 23.1 | V    | IF=15mA, Ta=70°C  |
| Operating life time 2), 3) | T      | -    | 40,000 | -    | h    | IF=15mA, Ta=25°C  |

- 1) For each "AN-CA"
- 2) When brightness decrease 50% of minimum brightness.  
The average life of a LED will decrease when the LCD is operating at higher temperatures.
- 3) Life time is estimated data.(Condition : IF=15mA, Ta=25°C in chamber).
- 4) An input current below 5mA may reduce the brightness uniformity of the LED backlight.  
This is because the amount of light from each LED chip is different. Therefore, please evaluate carefully before finalizing the input current.

## 10. Lot number identification

The lot number shall be indicated on the back of the backlight case of each LCD.

## 11. Warranty

### 11-1. Incoming inspection

Please inspect the LCD within one month after your receipt.

### 11-2. Production warranty

Kyocera warrants its LCD's for a period of 12 months from the ship date. Kyocera shall, by mutual agreement, replace or re-work defective LCD's that are shown to be Kyocera's responsibility.

|                                   |                                   |            |

|-----------------------------------|-----------------------------------|------------|

## 12. Precautions for use

### 12-1. Installation of the LCD

- 1) A transparent protection plate shall be added to protect the LCD and its polarizer.
- 2) The LCD shall be installed so that there is no pressure on the LSI chips.
- 3) The LCD shall be installed flat, without twisting or bending.
- 4) A transparent protection sheet is attached to the polarizer. Please remove the protection film slowly before use, paying attention to static electricity.

### 12-2. Static electricity

- 1) Since CMOS ICs are mounted directly onto the LCD glass, protection from static electricity is required.
- 2) Workers should use body grounding. Operator should wear ground straps.

### 12-3. LCD operation

- 1) The LCD shall be operated within the limits specified. Operation at values outside of these limits may shorten life, and/or harm display images.

### 12-4. Storage

- 1) The LCD shall be stored within the temperature and humidity limits specified.  
Store in a dark area, and protect the LCD from direct sunlight or fluorescent light.
- 2) Always store the LCD so that it is free from external pressure onto it.

### 12-5. Usage

- 1) **DO NOT** store in a high humidity environment for extended periods. Polarizer degradation bubbles, and/or peeling off of the polarizer may result.
- 2) The front polarizer is easily scratched or damaged. Prevent touching it with any hard material, and from being pushed or rubbed.
- 3) The LCD screen may be cleaned by wiping the screen surface with a soft cloth or cotton pad using a little Ethanol.
- 4) Water may cause damage or discoloration of the polarizer. Clean condensation or moisture from any source immediately.
- 5) Always keep the LCD free from condensation during testing. Condensation may permanently spot or stain the polarizer.
- 6) Do not disassemble LCD because it will result in damage.
- 7) This Kyocera LCD has been specifically designed for use in general electronic devices, but not for use in a special environment such as usage in an active gas. Hence, when the LCD is supposed to be used in a special environment, evaluate the LCD thoroughly beforehand and do not expose the LCD to chemicals such as an active gas.
- 8) Please do not use solid-base image pattern for long hours because a temporary afterimage may appear. We recommend using screen saver etc. in cases where a solid-base image pattern must be used.
- 9) Liquid crystal may leak when the LCD is broken. Be careful not to let the fluid go into your eyes and mouth. In the case the fluid touches your body; rinse it off right away with water and soap.

### 13. Reliability test data

| Test item                      | Test condition                       | Test time | Judgement                                                                                      |

- 1) Each test item uses a test LCD only once. The tested LCD is not used in any other tests.
- 2) The LCD is tested in circumstances in which there is no condensation.
- 3) The reliability test is not an out-going inspection.
- 4) The result of the reliability test is for your reference purpose only.  
The reliability test is conducted only to examine the LCD's capability.

Wiring methods FPC(cases NG)

下図のような、セット側基板などをまいた引き出しは、実装エリアに応力がかかり、部品の損傷が発生する恐れがあります。  
As shown below, wiring across the board and set implementation takes the stress area, may cause damage to components.

FPCを表示面側に折り曲げての取り付けは、FPCの断線が発生する恐れがあります。  
Installing the folded side to view the FPC is May cause breakage of the FPC.

| No | Description                                                            | Drawn           | Checked         | Checked | Approved        |

参考(for Reference)

FPC引き出し部は、1Minのクリアランスを設けてください  
FPC drawer unit, please provided a clearance of 1Min

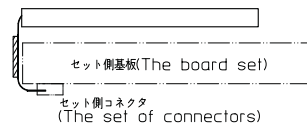

セット側コネクタ(The set of connectors)

セット側基板(The board set)

実装部品がセット基板などと接触しないような引き回しをしてください  
Please do not contact to the routing of printed circuit boards and components

部品実装エリア12(FPC自身の反発力で変形しない引き回しをしてください)

Mounting area 12(please do not deform in the resilience of its routing FPC)

部品実装エリア:Component Area

※取り付け例 (Installation guidance)

(NTS)

△ ※裏面の押さえつけ可能領域以外(押さえつけ禁止エリアを除く)を押さえると、取付構造によっては、表示ムラが発生する場合があります。  
しかしながら、GND接続等で押さええる必要がある場合は、25mm2 (5mm×5mm)に対して、0.33kgf (3.2N)を目安として下さい。  
なお、上記値は、参考数値であり、実際の取付構造により十分評価頂きますようお願いいたします。

(※ If area other than pressure available area on the rear side is pressured, there is a case that display variation is caused.  
However, when pressure is needed for GND connection or so, 0.33kgf (3.2N) per 25mm2 (5mm×5mm) will be a referential figure.  
Above figure is reference only. Therefore, please evaluate well under the actual installation structure.)

取り付け方法  
(Installation of the LCD)

ケースにモジュールをはめ込み(X,Y固定)、裏面からZ方向を固定する事が可能。  
(The LCD module shall be held in the X/Y direction by the housing, and in the Z direction using a backboard.)

斜線部の領域にて、下記の条件を満たし押さえることが望ましい。  
(To hold the LCD module in place, it shall be supported with pressure applied to the hatched areas indicated by the descriptions below.)

△ 押さえつけ可能領域  
(Pressure may be applied in this area.)

押さえつけ可能領域面積(裏面): 1308.0mm2  
(Pressure may be applied in this area (Back side): 1308.0mm2)  
参考全体重重: 4.4kgf (43.6N)  
(Referential total load: 4.4kgf (43.6N))  
参考平均圧力: 3.4gf/mm2 (33.7kPa)  
(Referential average pressure: 3.4gf/mm2 (33.7kPa))  
※上記値は参考数値であり、実際の取付構造により十分評価頂きますようお願いいたします。  
(Above figure is reference only. Therefore, please evaluate well by the actual installation structure.)

押さえつけ不可領域  
(Pressure failure area.)

表面取り付け条件  
(Installation conditions (Front side))

1.広い範囲で均一に押さえることが望ましい  
(1. The LCD shall be uniformly supported over as wide an area as possible.)

裏面取り付け条件  
(Installation conditions (Back side))

1.FPC部品実装エリアへの接触禁止  
(1. Do not allow any foreign material to contact the FPC Component Area.)  
2.モジュールがたわむことと無きよう押さえつけのこと  
(2. Do not allow the LCD module to bend or twist.)

3.広い範囲で均一に押さえることが望ましい  
(3. Support the LCD with uniform pressure over as wide an area as possible.)

注記 (Note)  
指定公差 (Tolerance without indication) : ±0.5
