Notes

- Input current specified at nominal input.
- Cross regulation for duals is ±5% when one output is at 100% and the other is varied between 25% and 100%.
- Measured with 1 µF ceramic capacitor across output rails.
- A 220 µF/250 V capacitor across the input is required in order to meet EN61000-4-4 and EN61000-4-5.
- For heatsink option add '-HK' to the end of the part number.
