■Precaution

1. Soldering Specifications

(1) Manual soldering

Device : Solder iron

- ① 420°C Max. 3 sec. Max.

(2) Auto soldering

- ② 275°C Max. 6 sec. Max.

The above-stated soldering conditions shall apply only to switches with straight terminals. Auto soldering is not possible with right-angle terminals. Switches with right-angle terminals should be soldered manually according to the conditions specified in (1) above.

- (3) When soldering two or more terminals to the common land, use the solder resist to isolate the terminals.

2. Flux Cleaning

- (1) Solvent : Fluorine or Alcohol type.

- (2) 8SS series are not washable. To wash the PC board, clean the soldering surface of the PC board with a brush so that the switch is not exposed to the cleaning solution.

- (3) Cleaning after soldering should be done after the terminal temperature falls to 90°C or below, or after leaving the switch for five minutes or longer at room temperature.

3. Mounting

- Do not bend the terminals before mounting the switch on the PC board.
- After mounting the switch, do not place the device in such a way that the device weight will be applied on to the actuator of the switch.
- For switches with straight terminals, solder the switch on the PC board after fixing the switch on the panel with a nut.
