FEATURES

- Compact, lightweight and multi-functional general-purpose pressure gauge.
- It is adopted welding integral structure with SUS304/316L at pressure receiving section.
- A pressure display function is substantial. (3 1/2digit, 7 segment LED, 2-color LED red / green change, Non-display mode)
- Two types of analog output , one is voltage output (1-5V),The other is current output (4-20mA) .
- The gage pressure is (0 ~ positive pressure), compound pressure range (negative pressure ~ positive pressure),to support maximum of 3.5 MPa.
- Comply with IP65, CE Marking and UL certification obtained.

- The settings indicated by "-" on the table above are not selectable because of resolution.
- Either "1"(for 102A, 102V, 102G, and 102R) or "8" (for 103G, 103R, 353G and 353R) are set prior to delivery.
- Changes of the multiplier factor apply to display values. Also, note the changes reset switch setting value and hysteresis.

SWITCH OUTPUT MODE

SW output is selectable by changing the value of first digit on the display.

(HI operation)	(A operation)
(L operation)	(B operation)
$P1 \leq P2$ or $P1 \geq P2$ H: Hysteresis, P1=Set 1, P2=Set 2 P3=Set 3, P4=Set 4	
$P1 \leq P3-2H$ and $P2 \leq P4-2H$	

- In the Separate mode, SW 1 corresponds to Setting 1 and SW2 corresponds to Setting 2.
- In the Window Comparator Mode, SW 1 corresponds to the Setting 1 (lower limit) and Setting 3 (upper limit). Also, SW2 corresponds to the setting 2 (lower limit) and setting 4 (upper limit).
- The Hysteresis (H) setting is common to SW 1 and SW 2 operations.
- When SW operation is changed between the Separate Mode and Window Comparator Mode, SW pressure settings that are set separately will be reset.

Others

● Tube at air intake

If there is a possibility that liquids such as water, oil etc splash to the main body and it may flow into the inside of the product through the air intake, connect a silicon tube to the air intake and position the other end of the tube in a suitable safe place. At that time, do not bend the tube or block the other end of the tube.

● Piping

Use a wrench on the hexagon of the fitting. Do not hold the main body when tightening.
