FEATURES

- Fast response zirconium dioxide (ZrO$_2$) sensor in conjunction with the OXY-LC oxygen sensor interface board
- Long life, non-depleting technology
- Integral heating element
- High accuracy
- Linear output signal

BENEFITS

- No reference gas required
- No need for temperature stabilisation
- Variety of probe mounting positions available; 28mm, 45mm & 55mm
- M18x1.5 screw mounting

</table>

- Output inactive start up delay (heater warm up)
  - From OFF to ON mode: 60s
  - From Standby to ON mode (RS485 only): 20s

OUTPUT VALUES

- Oxygen range (analogue output) 0.1—25% O$_2$
  or 0.1—100% O$_2$
- Oxygen range (Modbus RTU) 0.1—100% O$_2$
- Accuracy after calibration 0.5% O$_2$
- Accuracy after calibration 0.5% O$_2$
- Output resolution 0.01% O$_2$
- Response time (10—90% step) < 4s
- Initial warm up time (till stable output) 5—10mins

NOTES

1) The constant current source used in the pump circuit should be designed to drive a load of up to 6kΩ.
2) With baffle fitted to shield the sensor from direct cooling and pollution by the flue gas; refer to DS0122 ZrO$_2$ Screw Fit Probe Datasheet for fitment details.
3) Sensor and interface for correct barometric pressure compensation.

DESCRIPTION

The Oxygen Measurement System is a complete solution consisting of a zirconium dioxide oxygen sensor and interface PCB. Dimensional overview given below; full specifications for each, including complete outline drawing and electrical interface details can be found:

- DS0122 ZrO₂ Screw Fit Probe Datasheet
- DS0058 OXY-LC Oxygen Sensor Interface Datasheet

Contact technical@sstsensing.com for details.

ORDER INFORMATION

Referring to the tables below will allow you to tailor a system to suit your specific requirements.

For example: Ordering part numbers OXY-LC-A25-455 and O2S-FR-T2-18BM-C will create a system that has a 4—20mA analogue output from the board and a sensor probe that has a length of 28mm from the sensor tip to the beginning of the M18x1.5 screw mount.

CAUTION

Do not exceed maximum ratings and ensure sensor(s) are operated in accordance with their requirements. Zirconium dioxide sensors are damaged by the presence of silicone. Vapours (organic silicone compounds) from RTV rubbers and sealants are known to poison oxygen sensors and MUST be avoided. Do NOT use chemical cleaning agents.

Failure to comply with these instructions may result in product damage.

INFORMATION

As customer applications are outside of SST Sensing Ltd.’s control, the information provided is given without legal responsibility. Customers should test under their own conditions to ensure that the equipment is suitable for their intended application.

For detailed information on the sensor operation refer to application note AN0043 Operating Principle and Construction of Zirconium Dioxide Oxygen Sensors.
