REVISION HISTORY

Version	Date	Notes	Approver
1.0	15 May 2015	Initial Release	Jonathan Kaye
1.02	1 July 2014	Added product image Updated recommended DC supply voltage on VCC 1.8V to 1.8 V +/- 2%.	Andrew Chen
1.03	25 July 2014	Updated 1.8 VDC to +/-2% in the Specifications table Updated the Supply Voltage in the Specifications table Added the updated product images	Andrew Chen
1.04	03 Sept 2014	Removed SDC reference from part number. Added new photo	Andrew Chen
1.05	15 Sept 2014	Updated Molex mating connector – changed Molex 55560 Series 80 Pin Connector P/N 55560- 0804 to Molex 55560 Series 80 Pin Connector P/N 55560- 0807 due to unavailability of former part.	Andrew Chen
1.06	16 Sept 2014	Removed CAN interface references.	Andrew Chen
1.07	10 June 2015	Updated the Tx power and Rx sensitivity numbers.	Andrew Chen
1.08	2 Oct 2015	Fixed links in document	Andrew Chen
1.09	12 Oct 2015	Added link to Molex data sheets	John Imboden
1.10	27 April 2016	Updated Frequency Band and Operating Channel information in the Specifications table	Andrew Chen
1.11	12 May 2016	Added certification info & IDs for FCC, IC, ETSI, MIC, and KC	John Imboden
2.0	02 Aug 2016	Changed from <i>Hardware Integration Guide</i> to <i>Datasheet</i>	Sue White
2.1	24 Aug 2016	Removed <i>pending</i> status of WFA and CCX	John Imboden
2.2	21 Feb 2017	Updated FCC data to 24 non-overlapping channels	Jay White
2.3	10 Mar 2017	Updated 5 GHz frequency bands and operating channels info.	Kris Sidle
2.4	19 Apr 2017	Fixed FCC frequency range. Added section for MIC Requirements.	Sue White
2.5	7 June 2017	Minor updates to voltage supply current rating: 1.8 V changed from 500 mA to 250 mA; 3.3 V changed from 1000 mA to 900 mA	Andrew Chen
2.6	13 June 2017	Changed 1.8 VDC ±5% to 1.8 VDC -2% to+5% in the <i>Input Voltage Requirements</i> section.	Andrew Chen
2.7	13 June 2017	Changed the maximum supply voltage for the 1.8V VCC from 1.84 to 1.89 volts	Chris Cole
2.8	15 June 2017	Updated EU DoC with new RED standards	Tom Smith
2.9	06 Feb 2018	Removed SPI Slave references Removed EN 55022:2010 from the EU DoC	Chris Cole
2.10	16 May 2018	New template; updated IC Regulatory section	Maggie Teng
2.11	06 Mar 2019	Updated logos and URLs	Sue White

1 SCOPE

This document describes key hardware aspects of the Laird WB45NBT wireless bridge module. This document is intended to assist device manufacturers and related parties with the integration of this module into their host devices. Data in this document are drawn from a number of sources including data sheets for the QUALCOMM Atheros AR6003, CSR CSR8510, and Atmel AT91SAM9G25.

Note that the information in this document is subject to change. Please refer to the [WB45NBT product page](#) for the most recent documentation.

2 OPERATIONAL DESCRIPTION

This device is a Laird WB45NBT wireless bridge module, a wireless communications subsystem that may be integrated into a variety of host devices via a number of available electronic and logical interfaces. The Laird WB45NBT provides complete enterprise-class Wi-Fi connectivity with an integrated TCP/IP stack, full support for IEEE 802.11a/b/g/n and Bluetooth 4.0 dual-mode air standards with a fully integrated security supplicant providing 802.11i/WPA2 Enterprise authentication, data encryption, and BT protocol stacks.

The WB45NBT has a wide variety of interfaces including Fast Ethernet, serial UART, Hi-Speed USB, SPI, and I2C. The wireless bridge may be configured, monitored, and managed via a Command Line Interface (CLI) over an available dedicated console port, via a web interface over a wireless or Ethernet interface or via a remote SDK interface over wireless or Ethernet.

The WB45NBT incorporates a Wi-Fi SiP module using Qualcomm Atheros AR6003 which supports IEEE 802.11a/b/g/n. The CSR (CSR8510) Bluetooth chip supports Bluetooth standard 4.0 which includes the Bluetooth Low Energy (BLE) and legacy modes. The product features an ARM9 processor running at 400 MHz, 64 MB of Lower Power DDR (LPDDR) memory, and 128 MB of NAND flash storage running at 1.8 V to minimize power consumption. Several GPIO lines are available for data acquisition and similar applications. The platform runs an embedded Linux operating system based on the 3.x kernel. A Software Developer's Kit (SDK) with Application Programming Interfaces (API) and software tools are available for the development of custom software applications on the device.

The WB45NBT measures 40 mm long by 40 mm wide by 3.8 mm thick. The wireless bridge physically interfaces to the host device via an 80 pin board to board (B2B) connector (Molex SlimStack™ 54722 Series 80 pin connector P/N 54722-0804), which mates to a 1.5 mm stacking height mating part from Molex 55560 Series P/N 55560-0807. The WB45NBT may be secured to the host device via available grounded mounting holes. The WB45NBT operates at temperatures between -20° and + 70° degrees Celsius.

Contingent on compliance results, WB45NBT is a fully integrated module. It has its own RF shielding and does not require shielding provided by the host device into which it is installed in order to maintain compliance with applicable regulatory standards. As such, the device may be tested in a standalone configuration via a breakout board (BB45NBT). The BB45NBT schematic is available as a design reference in the software downloads tab of the [WB45NBT product page](#).

The WB45NBT provides two U.FL type antenna connectors; the main antenna (for Wi-Fi) and the auxiliary (for Bluetooth) work separately to get the best coexistence performance. Supported host device antenna types include dipole and monopole antennas.

Regulatory operational requirements are included in this document and may be incorporated into the operating manual of any device into which the WB45NBT is installed. The WB45NBT is designed for installation into mobile devices which typically operate at distances greater than 20 cm from the human body and portable devices which typically operate at distances less than 20 cm from the human body. See [Documentation Requirements](#) for more information.

3 BLOCK DIAGRAM

Note: Transmitter frequencies for Wi-Fi are 2412-2462 MHz and 5180-5805 MHz. Transmitter frequencies for Bluetooth are 2402-2480 MHz.

Note: Bluetooth functions on the AUX antenna and Wi-Fi operates at the Main antenna only.

4 SPECIFICATIONS

Feature	Description
Physical Interface	Pitch: 0.5 mm Stacking height: 1.50 mm Molex 54722 Series 80 Pin Connector P/N 54722-0804 Mating part: Molex 55560 Series 80 Pin Connector P/N 55560-0807 Note: See Mounting for mating connector options.
Ethernet Interface (3.3 V signal level)	10/100 Mbps RMII (Reduced Media Independent Interface)
Asynchronous Serial Port Interfaces (1.8 V signal level)	Four-wire UART with hardware handshaking (up to 921,600 baud) Two-wire UART (console) for debug purpose

Feature	Description																																																	
SPI Interface (1.8 V signal level)	Five Wire and Master modes supported with 2 chip select																																																	
USB Interfaces	Configurable USB Host port/Device port to support USB full speed and high speed data rates																																																	
Two Wire Interface (1.8V signal level)	Two-wire I2C (Inter-IC)																																																	
Debug Interface	Two-wire UART (console) for debug purpose																																																	
Digital GPIO (1.8 V signal level)	4 digital General Purpose I/O (GPIO)																																																	
Analog GPIO (3.3 V signal level)	4 analog General Purpose I/O (GPIO)																																																	
PCM interface	13-bit or 16-bit linear, 8-bit μ -law or A-law companded sample formats																																																	
Antenna Interface	2 Hirose U.FL connectors for Wi-Fi (Main) and BT (Aux) separately, 50 ohm Note: Wi-Fi and BT sharing a single antenna is NOT currently supported.																																																	
Wi-Fi Interface	Qualcomm Atheros AR6003 1X1 802.11 a/b/g/n on 20 MHz bandwidth																																																	
Bluetooth Interface	CSR CSR8510 Bluetooth 4.0 dual-mode (EDR+BLE)																																																	
Processor Chip Set	Atmel 400 MHz ARM 9, P/N AT91SAM9G25-CU																																																	
Operating System	Embedded Linux, 3.x kernel																																																	
Memory	64 MB LPDDR																																																	
Storage	128 MB SLC NAND flash																																																	
Input Voltage Requirements	3.3 VDC +/-5% (Backup) 3.3 VDC $\pm$ 5% (system) 1.8 VDC -2% to +5% (Memory and I/O interface) Note: Voltage ripple must be less than 30 mV.

Notes: Apply the 3.3 V (backup and system) and 1.8 V (memory & interface I/O) at the same time.

The CPU implements the internal POR (Power-On-Reset) and guarantees that the power sources will reach their target values prior to the release of POR.

$T_{res}=30\text{ us}$, $T_1=66\text{ us}$, $T_2=352\text{ us}$ (minimum)

Establish the VDDIO/CDDIOP (1.8 V for memory and interface I/O) and VCCBU (3.3 V) first, then VDDPLL (1.0 V from LDO), and the VDDCORE (1.0 V from DC-DC regulator) to ensure reliable device operation. This is implemented on the WB45NBT; apply 3.3 V (backup and system) and 1.8 V (memory and interface I/O) at the same time.

4.3.1. DC Electrical Characteristics (3.3 V signal level)

- I/O** Indicates whether the signal is input or output state.
- PU/PD** Indicates whether Pull-Up, Pull-Down, or nothing is enabled.
- ST** Indicates if Schmitt Trigger is enabled.
- TR** Tri-state

6 MECHANICAL SPECIFICATION

The following diagram shows the recommended clearance holes in the host PCB for U.FL antenna connectors.

Note: Laird recommends that you mount the module off the edge of the board or cut out one corner and place the module in the corner to limit the cutout area. This is necessary to meet the low height requirement of the module.

7.3. Documentation Requirements

In order to ensure regulatory compliance, when integrating the WB45NBT into a host device, it is necessary to meet the documentation requirements set forth by the applicable regulatory agencies. The following sections (FCC, Industry Canada, and European Union) outline the information that may be included in the user’s guide and external labels for the host devices into which the WB45NBT is integrated.

7.3.1. FCC

Note: You must place **Contains FCC ID: SQG-WB45NBT** on the host product in such a location that it can be seen by an operator at the time of purchase.

7.3.1.1 User's Guide Requirements

As outlined in the Operational Description, the WB45NBT complies with [FCC Part 15 Rules](#) for a Modular Approval. To leverage Summit's grant, the two conditions below must be met for the host device into which the WB45NBT is integrated:

1. The antenna is installed with 20 cm maintained between the antenna and users.
2. The transmitter module is not co-located with any other transmitter or antenna that is capable of simultaneous operation.

As long as the two conditions above are met, further *transmitter* testing is typically not required. However, the OEM integrator is still responsible for testing its end-product for any additional compliance requirements required with this module installed, such as (but not limited to) digital device emissions and PC peripheral requirements.

IMPORTANT!

In the event that the two conditions above **cannot be met** (for example certain device configurations or co-location with another transmitter), then the FCC authorization is no longer considered valid and the FCC ID **cannot** be used on the final product. In these circumstances, the OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate FCC authorization.

When using Summit's FCC grant for the WB45NBT, the integrator must include specific information in the user's guide for the device into which the WB45NBT is integrated. The integrator must not provide information to the end user regarding how to install or remove this RF module in the user's manual of the device into which the WB45NBT is integrated. The following FCC statements must be added in their entirety and without modification into a prominent place in the user's guide for the device into which the WB45NBT is integrated:

IMPORTANT NOTE: To comply with FCC RF exposure compliance requirements, the antenna used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

1. Reorient or relocate the receiving antenna.
3. Increase the separation between the equipment and receiver.
4. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
5. Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device is restricted to **indoor** use when operated in the 5.15 to 5.25 GHz frequency range.

FCC requires this product to be used indoors for the frequency range 5.15 to 5.25 GHz to reduce the potential for harmful interference to co-channel Mobile Satellite systems.

This device does not permit operations on channels 116-128 (5580 – 5640 MHz) for 11na and 120-128 (5600-5640 MHz) for 11a which overlap the 5600 -5650 MHz band.

IMPORTANT NOTE: FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

This device is intended only for OEM integrators under the following conditions:

- The antenna must be installed such that 20 cm is maintained between the antenna and users, and
- The transmitter module may not be co-located with any other transmitter or antenna,
- For all products marketed in the United States, the OEM must limit the operation channels from CH1 to CH11 for 2.4 GHz band by the supplied firmware programming tool. The OEM shall not supply any tool or information to the end-user regarding Regulatory Domain change.

As long as the three conditions above are met, further transmitter testing is not required. However, the OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed.

IMPORTANT NOTE: In the event that these conditions cannot be met (for example, certain laptop configurations or co-location with another transmitter), then the FCC authorization is no longer considered valid and the FCC ID cannot be used on the final product. In these circumstances, the OEM integrator is responsible for re-evaluating the end product (including the transmitter) and obtaining a separate FCC authorization.

7.3.1.2 End Product Labeling

This transmitter module is authorized only for use in device where the antenna is installed such that 20 cm is maintained between the antenna and users. The final end product must be labeled in a visible area with the following: "Contains FCC ID: SQG-WB45NBT".

7.3.1.3 Manual Information to the End User

The OEM integrator **may NOT** provide information to the end user regarding how to install or remove this RF module in the user's manual of the end product which integrates this module.

The end user manual shall include all required regulatory information/warnings as show in this Hardware Integration Guide.

7.3.2. Industry Canada

Industry Canada Statement

This device complies with Industry Canada's license-exempt RSSs. Operation is subject to the following two conditions:

- (1) This device may not cause interference; and
- (2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- 1) l'appareil ne doit pas produire de brouillage;
- 2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

This radio transmitter (IC: 3147A-WB45NBT) has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Le présent émetteur radio (IC: 3147A-WB45NBT) a été approuvé par Industrie Canada pour fonctionner avec les types d'antenne énumérés ci-dessous et ayant un gain admissible maximal. Les types d'antenne non inclus dans cette liste, et dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l'exploitation de l'émetteur.

Caution:

- (i) the device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems;
- (ii) for devices with detachable antenna(s), the maximum antenna gain permitted for devices in the bands 5250-5350 MHz and 5470-5725 MHz shall be such that the equipment still complies with the e.i.r.p. limit;
- (iii) for devices with detachable antenna(s), the maximum antenna gain permitted for devices in the band 5725-5850 MHz shall be such that the equipment still complies with the e.i.r.p. limits specified for point-to-point and non-point-to-point operation as appropriate; and

Operations in the 5.25-5.35GHz band are restricted to indoor usage only.

Avertissement:

- (i) les dispositifs fonctionnant dans la bande de 5150 à 5250MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux;
- (ii) pour les dispositifs munis d'antennes amovibles, le gain maximal d'antenne permis pour les dispositifs utilisant les bandes de 5250 à 5350MHz et de 5470 à 5725 MHz doit être conforme à la limite de la p.i.r.e;

(iii) pour les dispositifs munis d'antennes amovibles, le gain maximal d'antenne permis (pour les dispositifs utilisant la bande de 5725 à 5850 MHz) doit être conforme à la limite de la p.i.r.e. spécifiée pour l'exploitation point à point et l'exploitation non point à point, selon le cas;

Les opérations dans la bande de 5.25-5.35GHz sont limités à un usage intérieur seulement.

Radiation Exposure Statement

This equipment complies with Canada radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Déclaration d'exposition aux radiations

Cet équipement est conforme Canada limites d'exposition aux radiations dans un environnement non contrôlé. Cet équipement doit être installé et utilisé à distance minimum de 20cm entre le radiateur et votre corps.

This device is intended only for OEM integrators under the following conditions:

- 1 The transmitter module may not be co-located with any other transmitter or antenna.

As long as the condition above is met, further transmitter testing is not required. However, the OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed.

Cet appareil est conçu uniquement pour les intégrateurs OEM dans les conditions suivantes:

- 1 Le module émetteur peut ne pas être coïmplanté avec un autre émetteur ou antenne.

Tant que les 1 condition ci-dessus sont remplies, des essais supplémentaires sur l'émetteur ne seront pas nécessaires. Toutefois, l'intégrateur OEM est toujours responsable des essais sur son produit final pour toutes exigences de conformité supplémentaires requis pour ce module installé.

IMPORTANT NOTE

If these conditions cannot be met (for example certain laptop configurations or co-location with another transmitter), then the Canada authorization is no longer considered valid and the IC ID cannot be used on the final product. In these circumstances, the OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate Canada authorization.

NOTE IMPORTANTE

Dans le cas où ces conditions ne peuvent être satisfaites (par exemple pour certaines configurations d'ordinateur portable ou de certaines co-localisation avec un autre émetteur), l'autorisation du Canada n'est plus considéré comme valide et l'ID IC ne peut pas être utilisé sur le produit final. Dans ces circonstances, l'intégrateur OEM sera chargé de réévaluer le produit final (y compris l'émetteur) et l'obtention d'une autorisation distincte au Canada.

End Product Labeling

The final end product must be labeled in a visible area with the following: "Contains IC: IC: 3147A-WB45NBT".

Plaque signalétique du produit final

Le produit final doit être étiqueté dans un endroit visible avec l'inscription suivante: "Contient des IC: 3147A-WB45NBT".

Manual Information to the End User

The OEM integrator has to be aware not to provide information to the end user regarding how to install or remove this RF module in the user's manual of the end product which integrates this module.

The end user manual shall include all required regulatory information/warning as show in this manual.

Manuel d'information à l'utilisateur final

L'intégrateur OEM doit être conscient de ne pas fournir des informations à l'utilisateur final quant à la façon d'installer ou de supprimer ce module RF dans le manuel de l'utilisateur du produit final qui intègre ce module.

Le manuel de l'utilisateur final doit inclure toutes les informations réglementaires requises et avertissements comme indiqué dans ce manuel

7.3.3. European Union

User's Guide Requirements

The integrator must include specific information in the user's guide for the device into which the WB45NBT is integrated. In addition to the required FCC and IC statements outlined above, the following R&TTE statements must be added in their entirety and without modification into a prominent place in the user's guide for the device into which the WB45NBT is integrated:

Electromagnetic compatibility and Radio spectrum Matters (ERM); Broadband Radio Access Networks (BRAN); Specific conditions for 5 GHz high performance RLAN equipment
- **EU 2002/95/EC (RoHS)**
Declaration of Compliance – EU Directive 2003/95/EC; Reduction of Hazardous Substances (RoHS)

This device is a 2.4 GHz wideband transmission system (transceiver), intended for use in all EU member states and EFTA countries, except in France and Italy where restrictive use applies.

In Italy the end-user should apply for a license at the national spectrum authorities in order to obtain authorization to use the device for setting up outdoor radio links and/or for supplying public access to telecommunications and/or network services.

This device may not be used for setting up outdoor radio links in France and in some areas the RF output power may be limited to 10 mW EIRP in the frequency range of 2454 – 2483.5 MHz. For detailed information the end-user should contact the national spectrum authority in France.
