

Features:

- Small size and light weight
- Reliability and high quality
- “-HP” denotes high power
- “-UP” denotes ultra-high power
- Inner termination engineered to deter sulfur contamination
- RoHS compliant, REACH compliant, and halogen free
- AEC-Q200 qualified

Recommended Solder Profile

This information is intended as a reference for solder profiles for Stackpole resistive components. These profiles should be compatible with most soldering processes. These are only recommendations. Actual numbers will depend on board density, geometry, packages used, etc., especially those cells labeled with “*”.

100% Matte Tin / RoHS Compliant Terminations

Soldering iron recommended temperatures: 330 to 350°C with minimum duration.
Maximum number of reflow cycles: 3.

Peel-Off Strength Specifications

Top Adhesive Peel-off Strength: 10 g ~ 70 g.

Part Marking Instructions

Sizes 0805-2512, 0.1%, 0.5% and 1% tolerances (E96 and E24 Values)

The nominal resistance is marked on the surface of the overcoating with the use of

four character markings.

1. Values <100Ω will use "R" as the decimal holder.

1.21Ω

100Ω

Sizes 0805-2512, 5% tolerance, ≤ 0.91Ω (E24 Values)

The nominal resistance is marked on the surface of the overcoating with the use of

four character markings.

1. Values ≤ 0.91Ω will use "R" as the decimal holder.

0.68Ω

Sizes 0805-2512, 5% tolerance, ≥ 1Ω (E24 Values)

The nominal resistance is marked on the surface of the overcoating with the use of

three character markings.

1. Values between 1Ω and 9.1Ω will use "R" as the decimal holder.

1Ω

1.2 KΩ

Size 0603 (E24 Values)

The nominal resistance is marked on the surface of the overcoating with the use of

three character markings.

1. Values between 0.075Ω and 0.091Ω will use no decimal holder.
2. Values between 0.1Ω and 9.1Ω will use "R" as the decimal holder.
3. Values ≥10Ω will use no decimal holder.
4. 5% tolerance is not underlined. 1% tolerance is underlined.
- (Effective date for 1% underline marking is date codes on/or after April 1, 2025.)
5. Values that are both E24 and E96 follow E96 marking rules.

0.075Ω 5%

0.68Ω 5%

220Ω 1%

Size 0603 (E96 Values)

A two character number is assigned to each standard R-Value (E96) as shown in the chart below. This is followed by one alpha character which is used as a multiplier.

Each letter from "Y" - "F" represents a specific multiplier.

10.5Ω

Alpha Character = Multiplier	
Y = 0.1	C = 1000
X = 1	D = 10000
A = 10	E = 100000
B = 100	F = 1000000

Chip Marking	Value
01B =	10.0 x 100 = 1 KΩ
25C =	17.8 x 1000 = 17.8 KΩ
93D =	90.9 x 10000 = 909 KΩ

RoHS Compliance

Stackpole Electronics has joined the worldwide effort to reduce the amount of lead in electronic components and to meet the various regulatory requirements now prevalent, such as the European Union's directive regarding "Restrictions on Hazardous Substances" (RoHS 3). As part of this ongoing program, we periodically update this document with the status regarding the availability of our compliant components. All our standard part numbers are compliant to EU Directive 2011/65/EU of the European Parliament as amended by Directive (EU) 2015/863/EU as regards the list of restricted substances.

RoHS Compliance Status						
Standard Product Series	Description	Package / Termination Type	Standard Series RoHS Compliant	Lead-Free Termination Composition	Lead-Free Mfg. Effective Date (Std Product Series)	Lead-Free Effective Date Code (YY/WW)
RMCA	Automotive Grade Anti-Sulfur and AEC Qualified Thick Film Chip Resistor	SMD	YES RoHS Compliant by means of exemption 7c-I	100% Matte Sn over Ni	Always	Always

"Conflict Metals" Commitment

We at Stackpole Electronics, Inc. are joined with our industry in opposing the use of metals mined in the "conflict region" of the eastern Democratic Republic of the Congo (DRC) in our products. Recognizing that the supply chain for metals used in the electronics industry is very complex, we work closely with our own suppliers to verify to the extent possible that the materials and products we supply do not contain metals sourced from this conflict region. As such, we are in compliance with the requirements of Dodd-Frank Act regarding Conflict Minerals.

Compliance to "REACH"

We certify that all passive components supplied by Stackpole Electronics, Inc. are SVHC (Substances of Very High Concern) free and compliant with the requirements of EU Directive 1907/2006/EC, "The Registration, Evaluation, Authorization and Restriction of Chemicals", otherwise referred to as REACH. Contact us for complete list of REACH Substance Candidate List.

Environmental Policy

It is the policy of Stackpole Electronics, Inc. (SEI) to protect the environment in all localities in which we operate. We continually strive to improve our effect on the environment. We observe all applicable laws and regulations regarding the protection of our environment and all requests related to the environment to which we have agreed. We are committed to the prevention of all forms of pollution.
