MICRO RGB MATRIX TILE

Product Features

Led	
RGB LED	Individually-addressable RGB colour pixel.

The RGB LED modules on the Micro RGB Matrix Tile are almost half the size of those on the WiFi RGB Matrix and the RGB Matrix Tile for a higher-density arrangement. It uses the same data and power connectors as the above boards for easy tile serialization.

RGB LEDS

The RGBs used on this board are the Worldsemi WS2812B-2020 (datasheet), communicate at 800 Kbps and are compatible with Adafruit's NeoPixel libraries.

What's included

1 × Micro RGB LED Matrix Extension
