

10Gb Duplex Multimode 50/125 OM3 OFNP Fiber Patch Cable (LC/LC) - Aqua, 10 m (32.8 ft.), TAA

MODEL NUMBER: N820-10M-TAA

Rated OM3, this 50/125 multimode fiber cable with duplex LC connectors carries signals in 10/40 Gb Ethernet networks.

Features

Support Higher Bandwidths in Data Networks with OM3 Multimode 50/125 Fiber Patch Cable
As the amount of traffic in data networks grows, so does the need for next generation devices and fiber
cables to support higher bandwidths. This LC-to-LC multimode fiber optic Ethernet cable is well-suited for
10/40 Gb Ethernet applications up to 300 meters (984 feet) at 850 nm.

Use with VCSEL Light Sources for a Cost-Effective, High-Bandwidth Solution

The N820-10M-TAA is a laser-optimized multimode fiber (LOMMF) cable designed for use with vertical-cavity surface-emitting lasers (VCSELs) and LED lasers to offer a cost-effective, high-bandwidth solution over extended distances in the 850 nm wavelength range. It is commonly used in LANs, SANs and high-speed parallel interconnects for head-ends, central offices and data centers.

Experience Reliable Performance with Premium Construction

Premium materials ensure this multimode fiber cable reliably carries data and voice signals. The N820-10M-TAA has duplex male LC connectors on each end. The aqua OFNP (Optical Fiber Non-Conductive Plenum) jacket is highly fire-resistant, making this cable ideal for plenum areas such as drop ceilings and raised floors. It meets current IEEE 802.3ae and TIA LOMMF standards, and is compatible with existing OM3-rated 50/125 fiber solutions.

TAA-Compliant for GSA Schedule Purchases

The N820-10M-TAA is compliant with the Federal Trade Agreements Act (TAA), which makes it eligible for GSA (General Services Administration) Schedule and other federal procurement contracts.
