

Right Angle Adapter Product Brief

90° Port Adapters

For designs with minimal Z-height requirements

KP-ROR

Depending on your product design, you may need the ports facing to the sides instead of the top. Superior offers highly reliable, high-quality adapters that plug into the two ports of our pressure sensors for easy implementation. These 90° adapters reduce total z-height clearance with tubing to 10.75mm.

The 90° port adapters come with o-rings pre-installed. O-rings secure an airtight connection with the pressure ports. Adapters can be purchased in packages of 50 or 1000.

The KP-ROR is designed to operate solely with Superior's pressure sensors. It is intended for all sensor models except the CP301 and CP302.

Ordering Details

- KP-ROR-50 (package of 50)
- KP-ROR-1K (package of 1000)
