SMS relay and signaling module, monitor analog and digital values via cellular network and switch relay outputs remotely, communication via SMS and GPRS (e-mail transmission, app), supply voltage range 10 V  $\dots$  60 V AC

### Product description

The compact TC MOBILE I/O X200 signaling system is the successor to the PSI-MODEM-SMS-RELAY/6ADI/4DO/DC SMS relay (Order No. 2313520) and is used to monitor analog and digital values via the cellular network and switch relay outputs remotely. A USB connection to a computer and a web browser is all that is needed for configuration. The device features numerous helpful software functions, such as cellular diagnostics, sending of log books via e-mail, and different user roles.

### Your advantages

- · Notification via SMS on change of status at input
- · SMS status query of all inputs and outputs
- · SMS relay for remote control of outputs
- · Alarm generation on voltage failure via SMS
- GSM mobile phone network: 850, 900, 1800, and 1900 MHz
- · Switching of outputs for a predefined time
- · Communication via SMS and e-mail
- · 2 analog inputs
- · Configuration via USB and web browser
- · Compact design also for domestic installations (4 HP, DIN 43880)
- · Mounting on DIN rail or on the wall
