

product type designation

IWLAN attenuator N-Connect Male/Female

N-Connect male/female Attenuator 10 dB

electrical data

number of electrical connections	2
type of electrical connection	N-Connect male/ N-Connect female
transmission frequency	0 ... 6 GHz
impedance	50 Ω
return loss / minimum	23 dB
insertion loss / maximum	10 dB

mechanical data

tightening torque	4 ... 6 N·m
-------------------	-------------

ambient conditions

ambient temperature	
• during operation	-40 ... +100 °C
• during storage	-40 ... +100 °C
• during transport	-40 ... +100 °C
protection class IP	IP67

design, dimensions and weights

diameter	20.8 mm
length	53 mm
net weight	64 g

standards, specifications, approvals

certificate of suitability	
• RoHS conformity	Yes
reference code	
• according to IEC 81346-2:2019	RFB

Security information

security information	Siemens provides products and solutions with industrial cybersecurity functions that support the secure operation of plants, systems, machines and networks. In order to protect plants, systems, machines and networks against cyber threats, it is necessary to implement – and continuously maintain – a holistic, state-of-the-art industrial cybersecurity concept. Siemens' products and
----------------------	--

solutions constitute one element of such a concept. Customers are responsible for preventing unauthorized access to their plants, systems, machines and networks. Such systems, machines and components should only be connected to an enterprise network or the internet if and to the extent such a connection is necessary and only when appropriate security measures (e.g. firewalls and/or network segmentation) are in place. For additional information on industrial cybersecurity measures that may be implemented, please visit www.siemens.com/cybersecurity-industry. Siemens' products and solutions undergo continuous development to make them more secure. Siemens strongly recommends that product updates are applied as soon as they are available and that the latest product versions are used. Use of product versions that are no longer supported, and failure to apply the latest updates may increase customer's exposure to cyber threats. To stay informed about product updates, subscribe to the Siemens Industrial Cybersecurity RSS Feed under <https://www.siemens.com/cert>. (V4.7)
