

#### M12 female 90° A-cod. with cable

TPE 4x18AWG ye UL/CSA. ITC/PLTC 15m

Art.No.: 7700-12341-1501500

Weight: 1.087 Country of origin: CZ

Model designation: MSDL0-T150\_15.0

## Advantages of our connectors:

Our connectors are versatile and specially optimised for industrial environments. All connectors are 100% tested during the manufacturing process to ensure the highest quality and reliability.

The contacts are gold-plated, which ensures optimum conductivity. Thanks to the high degree of protection, the connectors are ideal for demanding industrial environments. They are also vibration-resistant - this is ensured by the union nut with vibration protection.

Our connectors are resistant to oils and cooling lubricants, but resistance to aggressive media should be tested for each specific application. Different cable lengths available on request

If you are missing technical information? Please feel free to use our dictionary to find more technical details.

#### **Product details:**

Cable is approved for 600 V Female 90° M12, 4-pole USA

Cable is approved for 600 V

Plastic housings with good resistance against chemicals and oils.

The resistance to aggressive media should be individually tested for your application. Further details on request. Further cable lengths on request.

| Freedom from ingredients (jacket)                 | lead-free, CFC-free, halogen-free                    |
|---------------------------------------------------|------------------------------------------------------|
| Outer-diameter (jacket)                           | 7,21 mm                                              |
| Tolerance outer diameter (sheath)                 | ±5%                                                  |
| Material wire insulation                          | PVC                                                  |
| Amount wires                                      | 4                                                    |
| Outer diameter insulation                         | 1,93 mm                                              |
| Outer diameter tolerance core insulation          | ±5%                                                  |
| Ingredient freeness wire insulation               | lead-free, CFC-free                                  |
| Amount strands (wire)                             | 19                                                   |
| Diameter of single wires                          | 18 AWG                                               |
| Conductor crosssection (wire)                     | 18 AWG                                               |
| Material conductor wire                           | Stranded copper wire, bare                           |
| Nominal voltage AC max.                           | 600 V                                                |
| Current load capacity (standard)                  | to DIN VDE 0298-4                                    |
| Current load capacity min. wire                   | 9,6 A                                                |
| Electrical resistance line constant wire          | 22,5 Ω/km @ 20 °C                                    |
| AC withstand voltage (wire - wire)                | 4 kV @ 60 s                                          |
| Power frequency withstand voltage (wire - jacket) | 4 kV @ 60 s                                          |
| Min. operating temperature (static)               | -40 °C                                               |
| Max. operating temperature (fixed)                | 105 °C                                               |
| Operating temperature min. (dynamic)              | -20 °C                                               |
| Operating temperature max. (dynamic)              | 90 °C                                                |
| Flame resistance                                  | IEC 60332-2-2   UL 1581 § 1090   UL 1581 § 1100 FT2  |
| chemical resistance                               | Good, application-related testing                    |
| Gasoline resistance                               | Good, application-related testing                    |
| Oil resistance                                    | Good, application-related testing   DIN EN 60811-404 |
| Bending radius (fixed)                            | 10 x Outer diameter                                  |
| Bending radius (dynamic)                          | 15 x Outer diameter                                  |
| No. of bending cycles (C-track)                   | 10 Mio.                                              |
| No. of torsion cycles                             | 3 Mio.                                               |
| Torsion stress                                    | ± 180 °/m                                            |
