Rugged Portable Phase Stable RF Analyzer Cable N Male to SMA Male Cable FM-FT430 Coax in 60

The type N male to SMA male 60 cable using FM-FT430 coax, part number FMCA1408-60, from Fairview Microwave is in-stock and ships same day. This Fairview type N to SMA cable assembly has a male to male gender configuration with 50 ohm flexible FM-FT430 coax. Fairview Microwave's flexible RF cable assemblies are ideal for applications where tight bends and continual flexure are required. The FMCA1408-60 type N male to SMA male cable assembly operates to 18 GHz. Fairview Microwave's rugged, portable, phase-stable RF analyzer cables are designed for field use and provide critical connections when used with portable and handheld network analyzers, spectrum analyzers or base station analyzers. These low loss, phase stable cable assemblies remain flexible while the tough armor provides water resistance, UV resistance, torque resistance and crush resistance. These rugged portable phase stable cable assemblies are compatible with Site Master, Sitehawk®, CellAdvisor®, Fieldfox® and other portable rf test instruments.

Custom versions of most RF cable assemblies can be built and shipped same day. Custom cable assembly lengths can be obtained by specifying the desired length on the web site at time of order or by contacting a sales representative. Other RF cable assembly value added services including connector orientation or clocking, heat shrink booting and labeling are also available. RF testing can also be performed to document the electrical performance of your cable assembly.
