Personal care and healthcare devices

Appliances

Healthcare

Users must independently evaluate the suitability of and test each product selected for their own specific applications. It is the User's sole responsibility to determine their fitness for a particular system or use based on their own performance criteria, conditions, specific application, compatibility with other parts, and environmental conditions. Users must independently provide appropriate design and operating safeguards to minimize any risks associated with their applications and products. Littelfuse products are not designed for, and may not be used in, all applications. Read complete Disclaimer Notice at littelfuse.com/disclaimer-electronics.

Personal care and healthcare products are becoming important aspects of everyday life

The personal care and healthcare monitoring device market is growing globally at a CAGR of ~6%

Market trends and drivers

Personal care and healthcare monitoring devices are becoming smarter, smaller, and battery powered with many electronic and sensing features

The personal care electrical appliances market size was valued at \$19.6 billion in 2020 and is projected to reach \$42.5 billion by 2031, at CAGR 7%

The global market for consumer healthcare devices has been estimated reach \$21.8 billion by 2027, steadily growing at a steady CAGR of 5%

Global health and wellbeing awareness is driving strong market growth of devices such as electric toothbrushes, blood pressure meters, heart rate monitors, as well as other innovative electronic healthcare products

Increased emphasis on incorporating AI technologies with use of real-time monitoring, recording, and reporting of information → increased use of electronic components and connectivity with mobile devices

Personal care market projection

Design complexities increasing as personal care and healthcare devices include more capabilities

Key design challenges

Faster time to market → engineers are under pressure to release new designs more frequently with new and advanced features

Extended battery life → Longer battery life and faster charging to extend equipment up-time

Innovative and compact designs → small PCB designs needed to meet new ergonomic and aesthetic features + improve user end-product experience

Littelfuse value proposition

Littelfuse UL/IEC certified devices can help reduce customer qualification time + Littelfuse can assist with global certifications, regulatory standards, and testing

Low resistance battery protection devices can help provide overcurrent and over-temperature protection while maximizing battery device run time & charging

Features such as small SMD packages enable for more compact designs and greater layout flexibility

Littelfuse helps designers improve safety, reliability, and efficiency + offers more design flexibility

Examples of Littelfuse products found in personal care and healthcare devices

AC input protection Fuse

User interface Switch

Battery protection PTC, TVS Diode, NTC

Control board Microcontroller

Primary coil
inside charger

AC main

Charging unit

Sensor

Motor

Mode select switch
H-bridge motor driver

LCD Screen

ON/OFF switch

Battery protection

Main MCU

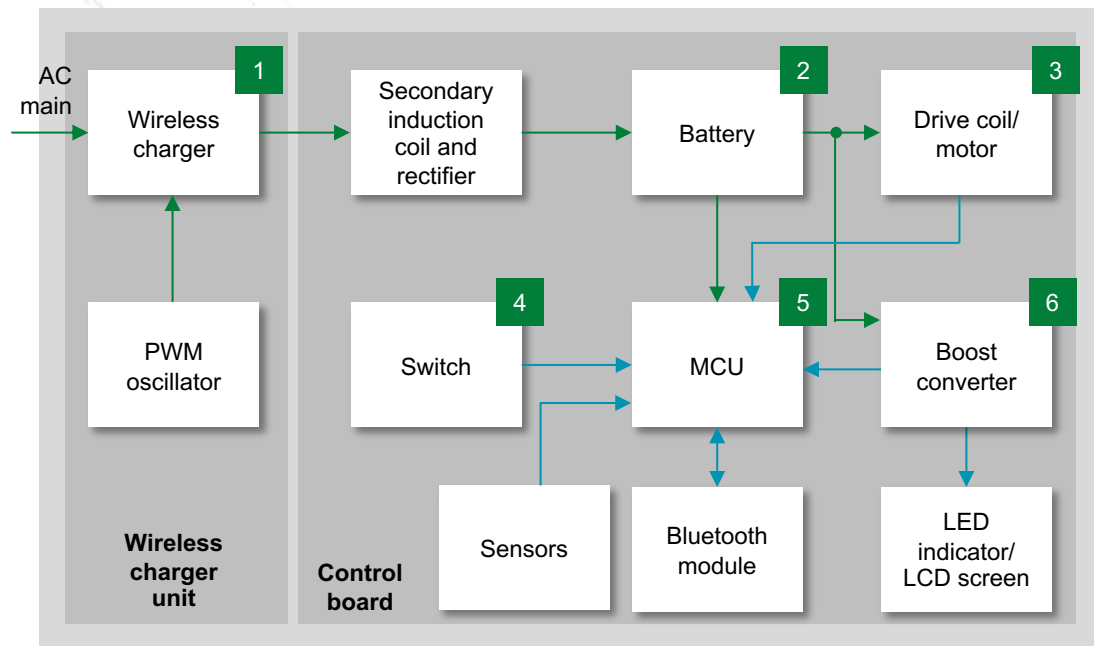

Bluetooth

Flash memory

Secondary coil
Inside toothbrush

Many personal care and healthcare devices share a similar system architectures

Click on the product series in the table below for more info

	Technology	Series
1	UL, IEC listed AC fuse	Axial/Radial (875) TR/TE (389)
2	PPTC	0805L , 1210L
	Fuse	494
	TVS Diode	P4SMA12A
	NTC	KR
3	PPTC	0805L , 1210L
4	Switch	PTS815 , KMS
5	MCU	S3F8S15 , S3F8S19 , S3F8S24 , S3F8S28 , S3F8S35 , Z8F1625*
6	PPTC	0805L , 1210L

Features and benefits of Littelfuse products found in typical personal care and healthcare devices

Click on the product series in the table below for more info

	Technology	Function in application	Product series	Benefits	Features
1	AC fuse	Protects the power stage from overcurrent events	Axial/Radial (875) TR/TE (389)	Reduces customer qualification time by complying with regulatory safety standards, such as UL/IEC	Compliant with UL/IEC standards; low internal resistance; shock safe; vibration resistant
2	PPTC	Protects battery from short circuit or over-current events	0805L , 1210L	Resettable protection, space-saving by enabling use of smaller TVS diode, low resistance enables longer battery life and faster charging	PolySwitch devices with low internal resistance; higher current holding in smallest SMD package
	Fuse		494	Allows for space saving	Surface mount, compact form factor, wide selection of current rating
	TVS diode	Input protection against voltage transients	P4SMA12A	Saves space; promotes more robust operation	Small form factor; excellent clamping
	NTC	Temperature sensing	KR	Promotes more robust operation; allows design flexibility	Surface mountable; small form factor
3	PPTC	Protects motor drive MOSFETs from overcurrent such as short-circuit or across the motor windings	0805L , 1210L	Resettable devices protects when needed and can resume operation when OK again, board space saving; enables overall better user experience	Low internal resistance; higher current holding in smallest SMD package
4	Switch	Turns unit on/off, selects speed, and function	PTS815 , KMS	Saves space; reliable and repeatable haptic performance elevates end-users' experience	C&K Switch Microminiature, short travel, PCB mount tactile with a minimum of 100 k-operations
5	MCU	Controlling specific functions such as turning on/off motor function and others	S3F8S15 , S3F8S19 , S3F8S24 , S3F8S28 , S3F8S35 , Z8F1625*	Simplifies design; low power consumption; smaller compared with 32-bit MCU (20-SSOP/SOP); available in pellet/die for chip on board	Robust to EFT (4 kV) and ESD; low power 5 V operation; LCD ON & IDLE mode: 2.5 μ A; Precision Internal Oscillator : $\pm 1\%$ @ 1.8 V~5.5 V and 25 $^{\circ}$ C; STOP mode: 1 μ A
6	PPTC	Protects the boost converter and LCD screen from inrush current damage during startup	0805L , 1210L	Board space saving; promotes robust operations	Low internal resistance; higher current holding in smallest SMD package

Select standards that may be applicable for personal care and healthcare medical devices

Standard	Title	General scope	Region
UL 1431	Standard for personal hygiene and health care appliances	These requirements cover household electric products with personal hygienics or health care applications, such as hydromassage units, contact lens disinfectors & cleaners, and toothbrushes, rated at 250 V or less, for use on premises that have wiring in accordance with the National Electrical Code	North America
IEC 60335	Household and similar electrical appliances–Safety–Part 1: General requirements	This standard deals with the safety of electrical appliances for household and similar purposes and their rated voltage being not more than 250 V for single-phase appliances and 480 V for other appliances, including direct current (DC) supplied appliances and battery-operated appliances	Global
UL 2054/1642	Household and commercial batteries	Safety standards that deal with cells and small portable batteries; UL1642 is applied to individual cells, whereas UL2054 is for small rechargeable battery packs	North America
IEC 62133-2 & UL 62133-2	Safety requirements for portable sealed secondary lithium cells	Evaluating protection during various battery-fault scenarios	Global
IEC 62368-1	Audio/video, information, and communication technology equipment–Part 1: safety requirements	This part of IEC 62368 is a product safety standard that classifies energy sources; prescribes safeguards against those energy sources; and provides guidance on the application of, and requirements for, those safeguards	Global

Local resources supporting our global customers

Partner for tomorrow's electronic systems

BROAD PRODUCT PORTFOLIO

An industrial technology manufacturing company empowering a sustainable, connected, and safer world

APPLICATION EXPERTISE

Our engineers partner directly with customers to help speed up product design and meet their unique needs

GLOBAL CUSTOMER SERVICE

Our global customer service team is with you to anticipate your needs and ensure a seamless experience

COMPLIANCE AND REGULATORY EXPERTISE

We help customers in the design process to account for requirements set by global regulatory authorities

TESTING CAPABILITIES

We help customers get products to market faster and offer certification testing to global regulatory standards

GLOBAL MANUFACTURING

High-volume manufacturing that is committed to the highest quality standards
