## Description

DFRobot SHT31 Weather-proof Temperature & Humidity Sensor is housed in a weather-proof enclosure and designed to use safely in outdoor projects. This sensor is waterproof, but is not suggested to submerge in water. For in-water measurement, the DS18B20 sensor is highly recommended. The sensor uses Sensirion's CMOSens® technology, highly integrated capacitive humidity sensing components, and band-gap temperature sensing components. The SHT31 sensor offers high reliability and long-term stability with low power consumption, fast response, and strong anti-interference ability. The sensor supports I<sup>2</sup>C communication and is compatible with 3.3V/5V controllers like Arduino, micro: bit, and ESP32. The SHT31 is the standard version of the SHT3x series. It provides humidity accuracy  $\pm 2\%$  RH @ 0% RH ~ 100% RH (at 25°C), and temperature accuracy  $\pm 0.2^\circ\text{C}$  @ 0°C ~ 90°C (typical).

## Features

- Weather-proof
- High precise, internal auto-calibrated, and digital output
- Low power consumption, fast response, and strong anti-interference

## Specifications

- 3.3V ~ 5V operating voltage range
- <1.5mA operating current
- 0%RH ~ 100%RH humidity detection range
- Humidity accuracy of  $\pm 2\%$  RH @ 0%RH ~ 100%RH (at 25°C)
- -40°C ~ 125°C temperature detection range
- Temperature accuracy of  $\pm 0.2^\circ\text{C}$  @ 0°C ~ 90°C (typical)
- I<sup>2</sup>C communication
- Cable length of about 1m
